See the images and read the stories behind the creative process of one of America's most respected landscape photographers, William Neill. For more than two decades, William Neill has been offering his thoughts and insights about photography and the beauty of nature in essays that cover the techniques, business, and spirit of his photographic life. Curated and collected here for the first time, and accompanying 128 beautiful reproductions of Neill's photographs, these essays are both pragmatic and profound, offering readers an intimate look behind the scenes at Neill's creative process behind individual photographs as well as a discussion of the larger and more foundational topics that are key to his philosophy and approach to work. Drawing from the tradition of behind-the-scenes books like Ansel Adams' Examples: The Making of 40 Photographs and Galen Rowell's Mountain Light: In Search of the Dynamic Landscape, Light on the Landscape covers in detail the core photographic fundamentals such as light, composition, camera angle, and exposure choices, but it also deftly considers those subjects that are less frequently examined: portfolio development, marketing, printmaking, nature stewardship, inspiration, preparation, self-improvement, and more. The result is a profound and wide-ranging exploration of that magical convergence of light, land, and camera. Filled with beautiful and inspiring photographs, Light on the Landscape is also full of the kind of wisdom that only comes from a deeply thoughtful photographer who has spent a lifetime communicating with a camera. Incorporating the lessons within the book, you too can learn to achieve not only technically excellent and beautiful

images, but photographs that truly rise above your best and reveal your deeply personal and creative perspective—your vision, your voice.

In *The Nikon Autofocus System, 2nd Edition*, photographer Mike Hagen, author of the bestselling *The Nikon Creative Lighting System*, takes his deep knowledge of Nikon technology and concentrates on its focus features. In this book, which covers all current Nikon DSLR models (including the D5 and D500), Hagen fully explains how Nikon autofocus works, including detailed discussions of all the autofocus modules, drive systems, and camera buttons and menus. He also devotes an entire chapter to explore how focus works with Nikon's lenses.

Armed with this general knowledge, Hagen then dives deep and offers camera setups, settings, and best practices for specific field techniques that address the photographic genres that are notoriously challenging for focus: action and sports (indoor and outdoor), wildlife (including birds in flight), and macro photography. He also covers genres such as portrait, landscape, underwater, low-light, and street photography. Hagen not only advises on the best ways to set up the camera and focus systems, he gives helpful tips and tricks throughout the book.

The Nikon Autofocus System also covers:

- Live view autofocus methods and settings
- Achieving great focus in video
- AF tracking
- AF shooting styles, such as back-button AF and shutter-release AF
- HDR, panoramas, and other techniques for shooting with a tripod
- An entire chapter on additional terms and techniques, such as hyperfocal distance, calibrating lenses, focus and flash photography, and more
