I set Auto ISO to 1,600 max because the noise from the D80 at ISO

1,600 looks much better than blur. I set 1/15 because my Nikon 18-200mm gives great results down to 1/15. I adjust the lowest shutter speed setting in the AUTO ISO menu if I change conditions or lenses. Unlike film, my D80 looks great at high ISOs, so I use them anytime I need them. The first thing  
that I noticed when  
I picked up the  
Nikon D80 for this  
guide is that it's  
one solid hunk of a  
camera. Bucking the  
recent tradition of  
making digital SLRs  
smaller (examples  
of this include the  
Canon xTi and  
Olympus E-410 and  
E-510) the D80 is a  
large camera with a  
more professional  
feel to it.
