Nikon camera TTL History - What is TTL, D-TTL, iTTL

Camera in both manual and automatic mode (manual mode worked much better) and flash in iTTL mode. I played with 2 lens (18-210 F4-6.3 and a prime 35 F1.8). I was able to do a pretty OK job at freezing the action but none of the pictures were great mainly due to the slower speed lens I was using.

Camera Auto ISO and Nikon Flash - scantips.com

The TTL feature of a Nikon dedicated flash will only work with Nikon, however, it could possibly still be used in manual mode. In a nutshell, TTL is the way that the camera sets the exposure and flash intensity automatically by firing a nearly imperceptible pre-flash, taking an exposure reading, and adjusting settings accordingly.

All other Nikon flash modes have only one TTL mode, so some flash models are obsolete now for digital iTTL, but all can still do

manual flash mode on all the models. See the Nikon Speedlight Compatibility chart. TTL on a modern Nikon DSLR will need an iTTL flash. Canon uses ETTL. Below, we are discussing the current iTTL camera models.
