Going manual, as Trev points it out

every so often, I have no problem balancing foreground/flash and ambient/background using the diverse compensation dials on cam and on the flash in iTTL or just aperture/time/manual flash. However, this fails horribly if I enter any one of the automatic modes.

How to Understand the Difference Between TTL Versus Manual ...

Using an optional flash unit such as the Nikon SB-400 or SB-900 makes it possible to achieve optimal exposure at greater distances than with the built-in flash. We recommend using an optional flash unit when taking photographs at weddings and in other situations in which you may frequently be taking photographs at a distance from the subject. Subject photographed at short range with a low-power (low guide number) flash [Nikon camera TTL History - What is TTL, D-TTL, iTTL](#)

The iTTL wireless Commander offers the only Nikon method for multiple flash units, and offers true control of individual flash groups (limited to two or three of them). Its default mode is to meter individual flashes and set power of all flashes power level to be equal intensity at the subject.

Camera in both manual and automatic mode (manual mode worked much better) and flash in iTTL mode. I played with 2 lens (18-210 F4-6.3 and a prime 35 F1.8). I was able to do a pretty OK job at freezing the action but none of the pictures were great mainly due to the slower speed lens I was using.

In July 2003, Nikon announced the D2H, the first of what would be four cameras from the D2 family, along with a new SB-800 flash. They were the first installment to Nikon's iTTL and Creative Lighting System (CLS). The new triple-digit model number without the DX suffix indicated the new flash technology.

iTTL Basics

The TTL feature of a Nikon dedicated flash will only work with Nikon, however, it could possibly still be used in manual mode. In a nutshell, TTL is the way that the camera sets the exposure and flash intensity automatically by firing a nearly imperceptible pre-flash, taking an exposure reading, and adjusting settings accordingly.

Best Budget TTL Flash for Nikon: Get External Flash in 2020

In the manual mode guide, it has seven distinct power flash levels along with eight output control levels and twenty-two exceptional tuning levels. It has features like a built-in bounce card, four channels,
