The online manual we linked to is for the N8008, not the N8008s, which includes spot metering. So you can add spot metering mode to the meter mode setting options that you toggle through.

Technical Specification for Nikon F801s / N8008s SLR camera  
This is a group for those of us who like film cameras and more specifically, the Nikon N 8008 series and its European equivalent, the F801 series. The N8008/F801 beat the F4 to market by some months and during the interim it was the most advanced Nikon, whetting the appetites of pro users waiting for the F3 replacement. Indeed, when it finally landed in the stores the F4 had many of the ...

*Nikon F-801 - Wikipedia*

Its traditional controls allow you to switch between autofocus and manual focus. It uses the Nikon Bayonet lens mount and is compatible with most AI lenses. These include lenses like the Nikon Nikkor AF-D 35mm f/2.8 lens and AF lenses as well. The N8008s was an update to the N8008.

Ever since Nikon came up with Flex Program with the N8008 (at least that was my first SLR with that option) so that I can manually select different equivalent shutter speed/aperture combinations while the camera determines exposure, I have been using it instead of Aperture Priority, which I "grew up with" using the FE/FE2.

The Nikon F-801 (sold as the N8008 in the US market) is a 35mm SLR released in June 1988. Although its autofocus mechanism is slow in comparison to modern standards, it was an improvement on Nikon's first attempt at an autofocus SLR - the F-501 (N2020 in North America), and proved to be reliable and durable, typical of Nikon's cameras.

Nikon N8008 / F-801 – Camera Review ... Its autofocus system (switchable to manual focus as well) operates extremely well. While certainly a bit slow compared to today's cameras, it's still fast enough to get the job done in most situations. It uses what Nikon calls their “Advanced AM200” module, whatever that means.
