David Busch's Nikon D850 Guide to Digital SLR Photography Rocky Nook, Inc.

Capturing the grandeur of landscapes or mood of a certain natural light is challenging but often the simple details of a texture or color evade photographers most of all. In Close Up Photography in

Nature, best-selling authors and nature photography pros, John and Barbara Gerlach, share the tips and techniques necessary to successfully photograph the beauty all around you. The Gerlachs are celebrated teachers who understand a photographer's mind so they begin this book with a brief overview of the fundamentals before delving into some of the more advanced and unique challenges of close up photography. Topics covered include: advanced flash techniques specific for close up shooting, as well as a discussion on focus stacking strategies and tilt-shift lenses for getting maximum depth-of-field. The Gerlachs also discuss their strategy of mixing flash with natural light when shooting close up, which opens up all sorts of photographic possibilities – opening up shadows, creating shadows, separating the subject from the background, reducing contrast between the subject and the background, improving the color rendition, shooting sharper images, and much more. This book will change the way you see the world as well as the way you share it through your work! the world through your work!

Mastering the Nikon D850 Rocky Nook, Inc.

David Busch's Nikon Z6 Guide to Digital Photography John Wiley & Sons

Mastering Nikon Speedlights is the most comprehensive guide available for anyone using or wanting to learn more about the Nikon Creative Lighting System (CLS). Starting with an exploration of how to work with

light, the book teaches you everything you need to know about understanding the direction and intensity of light, using light meters and metering modes, controlling exposure, and much more. You'll learn the specifics of how to use the full range of Nikon Speedlights and accessories, including past and current models of cameras and CLS compatible flashes—and in the process you'll find out how to get the best shots with your gear, whether you have a whole box of equipment or just the basics. The book includes practical, real-world photo shoots—portraits, action shots, and product photography—starting with one light and gradually working up to multiple lights so you can observe the progression of the light from one flash to many. No matter what your subject or shooting scenario, *Mastering Nikon Speedlights* is an essential resource that teaches you how to produce the light you need to achieve great results. Offers a thorough discussion of the qualities of light, how the camera measures light, and the settings needed to record an image with proper exposure. Provides a complete overview of all the components that make up the Nikon Creative Lighting System, outlining how to use the different Speedlights and accessories to correspond with each camera's unique capabilities. Covers how to use the Nikon Speedlights off the camera using the Advanced Wireless Lighting (AWL) features built into the Creative Lighting System. Features several examples of real photo shoots, showing you how to take great photos in a variety of situations, building from one flash up to multiple flashes.

Sons

This essential guide shows amateur photographers of all levels how to conquer more than 25 tricky exposure scenarios frequently found in the field. As every amateur shutterbug knows, certain exposure situations prove frustrating time and time again, whether photographing a high-contrast snow scene or getting the perfect backlit portrait. In this ready reference, bestselling author Bryan Peterson demystifies common stumbling blocks one by one, with tips and techniques for getting a great shot every time.

Outdoor Flash Photography Taylor & Francis

The classic look of film noir portraits was iconic to the 1930s and 1940s - the use of light, shadows and styling created a timeless look that is as popular today as ever. This practical book explains how to take photos and use lights to create powerful portraits typical of this time. With over 100 photographs, it covers the equipment needed; explores the types of images that are classed as film noir; shares tips and tricks to improve your images; guides you through the lighting set-ups in detail; recreates some classic film noir images and ideas, and finally, explains how to shoot film noir images inside and outside on location. It will be of great interest to photographers particularly with film interest; 1930s and 1940s enthusiasts; Hollywood interest and movie goers. Neil Freeman is a professional photographer, tutor and writes for various photography magazines and it is beautifully illustrated with 114 colour photographs.

Close Up Photography in Nature Rocky Nook, Inc.

This newly revised edition of Bryan Peterson's most popular book demystifies the complex concepts of exposure in photography, allowing readers to capture the images they want. Understanding Exposure has taught generations of photographers how to shoot the images they want by demystifying

the complex concepts of exposure in photography. In this newly updated edition, veteran photographer Bryan Peterson explains the fundamentals of light, aperture, and shutter speed and how they interact with and influence one another. With an emphasis on finding the right exposure even in tricky situations, *Understanding Exposure* shows you how to get (or lose) sharpness and contrast in images, freeze action, and take the best meter readings, while also exploring filters, flash, and light. With all new images, as well as an expanded section on flash, tips for using colored gels, and advice on shooting star trails, this revised edition will clarify exposure for photographers of all levels.

Mastering the Nikon COOLPIX A Rocky Nook, Inc.

Mike Hagen opens up a whole new world to those photographers who are already well versed in photography, but may not have a clue about flash photography. With the new and rapidly evolving technology, flash photography (especially advanced light modeling with modern iTTL flash systems) has become an art in itself and should be mastered by all aspiring photographers-amateurs as well as professionals-who are often helpless when it comes to using the full potential of these systems. Using a simple, step-by-step method for setting up and using the newest Nikon iTTL flash units, Mike teaches all the steps required to achieve consistent and amazing flash photos. He solves the common frustrations associated with flash and teaches readers how to use the SB-500, SB-600, SB-700, SB-800, SB-900, SB-910, and R1C1 strobes. Also included is a chapter showing system configuration so readers can duplicate the desired results on their own. Beginning at a basic level and progressing to more advanced techniques, Mike teaches you everything you need to know about mastering Nikon's iTTL flash system.
