In this volume, Mellor measures by household class the employment impact of alternative agricultural growth rates and land

tenure systems, and impact on cereal consumption and food security. The book provides detailed analysis of each element of agricultural modernization, emphasizing the central role of government in accelerated growth in private sector dominated agriculture. This new book is a follow up to Mellor's classic, prize-winning text, *The Economics of Agricultural Development*. Listed as a Best Books of 2017: Economics by Financial Times.

The integration of market economies is one of the most remarkable features of international economics, which has important implications for macroeconomic performance in open economies. Equally important is the declining relevance of the real versus the monetary theory dichotomy. These papers focus on those aspects of monetary policy which relate to credibility and non-neutrality; the domestic adjustment to foreign shocks; the interdependence of open economies and their strategic interactions. An important section is also devoted to the innovative modelling of exchange rate dynamics.

Hindutva is the only binder which can galvanize the Indian nation towards progress and prosperity. In essence, nationalism is synergy. The effort of four Indians should yield the result equivalent to five or six of them. Most Christians and Muslims of India have a Hindu ancestry. Their collective memory has not necessarily forgotten their castes. It is not uncommon to find a Catholic claiming himself to be a Brahmin and insisting on a Brahmin bride. Nor is it unusual to come across a Muslim who claims that he is a Rajput to indicate that he is not a convert from any other caste. The Bohras are forthright in their claim that all of them were converted from Brahmins.

The Human Development Report, now in its seventh edition, updates the unique Human Development Indicators comparing human development in most countries of the world, and the data tables on all aspects of human

development. The special focus of this edition is on the important link between economic growth and human development. The Report maintains that the link is not automatic but can be established through proper policy management, arguing the case for initiating and accelerating economic growth and at the same time accelerating and sustaining human development in different parts of the world. The Report also maintains that the quality of growth is as important as its quantity; otherwise, growth can be jobless, voiceless, ruthless, rootless, and futureless. It identifies employment as an important instrument in translating the benefits of economic growth into people's lives. An indispensable resource for courses in international development, the Report ranks 174 countries according to the Human Development Index (HDI). It also gives the global ranking of more than 100 countries in terms of Gender-Related Development Index (GDI) and the Gender Empowerment Measure (GEM). The first index represents HDI, taking into account gender inequality in capabilities, and the second represents female opportunities in selected economic and political areas. New to this edition is the Capability Poverty Measure (CPM), which is used as an alternative to the traditional income poverty measure. The Report concludes that the future challenge is how to forge and sustain the desired kind of linkage between economic growth and human development in a globalized world which represents both opportunities and threats for the nations of the world.
