In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all

brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

A woman contemplates suicide as her best friend lies dying. A touching graveside ritual keeps love alive. The cracks in a long-time marriage are revealed when the scotch runs out. A young couple experience the ecstasy and agony of first love. A Month of Sundays shines a light on our most vulnerable moments and finds the grace and dignity within. There is beauty in survival, in knowing we can overcome. We suffer unbearable losses, love the wrong people, and make a mess of our lives, but we go on. Some of the most important moments happen when we are raw and exposed. This collection of a dozen stories explores those dark corners that define us, the emotional spaces we prefer to avoid.

The automotive industry is under constant pressure to design vehicles capable of meeting increasingly demanding challenges such as improved fuel economy, enhanced safety and effective emission control. Drawing on the knowledge of leading experts, *Advanced materials in automotive engineering* explores the development, potential and impact of using such materials. Beginning with a comprehensive introduction to advanced materials for vehicle lightweighting and automotive applications, *Advanced materials in automotive engineering* goes on to consider nanostructured steel for automotive body structures, aluminium sheet and high pressure die-cast aluminium alloys for automotive applications, magnesium alloys for lightweight powertrains and automotive bodies, and polymer and composite moulding technologies. The final chapters then consider a range of design and manufacturing issues that need to be addressed when working with advanced materials, including the design of advanced automotive body structures and closures, technologies for reducing noise, vibration and harshness, joining systems, and the recycling of automotive materials. With its distinguished editor and international team of contributors, *Advanced materials in automotive engineering* is an invaluable guide for all those involved in the engineering, design or analysis of motor vehicle bodies and
