Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. Farewell to the Good Old Days is a lively and intimate tale by David Greatrix, a man who has lived a dynamic professional life, first as an aerospace engineer and then as a professor of the subject. The book, leaning heavily on the actual life experiences of Greatrix and a number of his academic colleagues close and far away, is divided into two discrete parts; the book's narrator for both parts is nominally a fictional consolidated representation of Greatrix, drawing from various sources in addition to the author. Part One covers the narrator's childhood and early adulthood, followed by his moving into his years of growth as a professional breaking into the challenging field of aerospace engineering. Part Two tracks the narrator's subsequent twenty-five-year academic career as a professor of aerospace engineering at a university in a major urban centre. Prominent in this story are the many challenges the narrator encounters in his navigation of academe in a high-profile setting for engineering education. In an emotional narrative that never strays far from various shades of humour, the narrator shares the details of his teaching and research experience at his institution, frequently bumping up against the pointy bits of an evolving cosmopolitan academic culture. In colourful detail, the narrator reveals the small successes, notable failures, unexpected events, and crushing disappointments that describe his tenure at his university. The narrator is especially candid in his revelations about episodes of betrayal. He takes aim at big targets, including the Canadian government, university administrators, and the academic superstructure as a whole. The result is an enlightening view into an individual's complicated experience in a demanding world that serves as a microcosm of society at large.
