An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean

smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Corrupt politicians conspire to overthrow the American government for personal gain and an insatiable appetite for China and Mexico to rule a bankrupt United States threatens the entire nation. Americans go hungry and resort to anarchy as the nation's food has vanished while an insurgence of more than a quarter million illegal immigrants mysteriously gains entry. Grimly, it all adds up to one fateful outcome - the end of a sovereign America, the Constitution, and the way of life as we know it. But it's all up to one man to save the country from ruins, and the charismatic Cleat Masin aims to do just that. As a HITS agent and Special Forces Sergeant Major, Masin must race against the clock, powerful foes, and a corrupt government to destroy a menacing satellite and its evil operator. A World War II pilot, plane, and general go missing, and the discovery of a seventy-year-old missing Mexican-American decree eludes him, but finding it could mean the end of a hostile take over of a broke United States. Join Masin in this suspenseful action drama, based on some real life scenarios, as he fights to outsmart his evil vixens, unravel long-unsolved mysteries, and along the way finds more than he bargained for with a blossoming romance.
