current tribological problems in modern internal combustion engines—from an introduction to the valvetrain operation to the processes that produce wear in the components of the valvetrain. A valuable resource for teachers and students of mechanical or automotive engineering, as well as automotive manufacturers, automotive designers, and tuning engineers.

- Shows the tribological problems occurring in the guide-light valve-seat insert - Combines numerical and experimental solutions of wear and friction processes in valvetrain systems - Discusses various types of cam and camless drives the valves used in valve trains of internal combustion engines—both SI and CI - Examines the materials used,

Cherylann is

her account of a life filled with loss and abandonment by the very people, her family, who should have protected and loved her. Cherylanns ability to articulate her xperiences are inspiring and gripping. She also forces the reader to take a hard look at the medical community and how

they deal with children of abuse who often grow up with poor coping skills and selfdefeating behaviors. Written from the heart, Cherylanns harrowing childhood will keep you up at night. Despite her sad despair, Cherylanns inner strength, courage and justified anger, saved her time and again.

This cant put down book will remind readers of the innocence of children and their need for societys protection, even from parents, and in this case, parents who loved themselves more than they loved a precious child named Cherylann.
