Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater

than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The renowned Japanese scholar "brings us as close to the inner life of the Meiji emperor as we are ever likely to get" (The New York Times Book Review). When Emperor Meiji began his rule in 1867, Japan was a splintered empire dominated by the shogun and the daimyos, cut off from the outside world, staunchly antiforeign, and committed to the traditions of the past. Before long, the shogun surrendered to the emperor, a new constitution was adopted, and Japan emerged as a modern, industrialized state. Despite the length of his reign, little has been written about the strangely obscured figure of Meiji himself, the first emperor ever to meet a European. But now, Donald Keene sifts the available evidence to present a rich portrait not only of Meiji but also of rapid and sometimes violent change during this pivotal period in Japan's history. In this vivid and engrossing biography, we move with the emperor through his early, traditional education; join in the formal processions that acquainted the young emperor with his country and its people; observe his behavior in court, his marriage, and his relationships with various consorts; and follow his maturation into a "Confucian" sovereign dedicated to simplicity, frugality, and hard work. Later, during Japan's wars with China and Russia, we witness Meiji's struggle to reconcile his personal commitment to peace and his nation's increasingly militarized experience of modernization. Emperor of Japan conveys in sparkling prose the complexity of the man and offers an unrivaled portrait of Japan in a period of unique interest. "Utterly brilliant . . . the best history in English of the emergence of modern Japan."—Los Angeles Times

Culture has an abiding influence on the way countries and business corporations are governed. This book introduces the reader to the deep philosophies that drive corporations and governments in East Asia, from China through Japan and South Korea to Singapore. With sparkling clarity and spiced with anecdotes and case studies, it depicts how respect for cultures can lead to spectacular success, or the lack of it to failure. Confucian practices such as guanxi in Chinese society, the benevolent culture of entity firms in Japan, and patriarchal chaebols in South Korea are analyzed with examples like Esquel, Nissan, and Samsung. A delightful chapter on Daoism shows how it drives Jack Ma's Alibaba.com. In the governance of nations, the author reinforces Burke's dictum that systems of government must be consonant with traditional cultures, and he calls out misguided attempts by the West to foist liberal democracies on civilizations in the

East where respect for authority and communitarian values come before individual interest. The author advances the novel concept of the meritocratic democracy in which leaders are chosen not by electoral popularity but by proven ability. In a thought-provoking concluding chapter, he evaluates prospective constitutional changes in China that would enshrine meritocratic democracy as an alternative to liberal democracies that have turned dysfunctional in many Western nations.

Revealing glimpses of the Philippine Revolution and the Filipino writer Jose Rizal emerge despite the worst efforts of feuding academics in Apostol's hilariously erudite novel, which won the Philippine National Book Award. Gina Apostol's riotous second novel takes the form of a memoir by one Raymundo Mata, a half-blind bookworm and revolutionary, tracing his childhood, his education in Manila, his love affairs, and his discovery of writer and fellow revolutionary, Jose Rizal. Mata's 19th-century story is complicated by present-day foreword(s), afterword(s), and footnotes from three fiercely quarrelsome and comic voices: a nationalist editor, a neo-Freudian psychoanalyst critic, and a translator, Mimi C. Magsalin. In telling the contested and fragmentary story of Mata, Apostol finds new ways to depict the violence of the Spanish colonial era, and to reimagine the nation's great writer, Jose Rizal, who was executed by the Spanish for his revolutionary activities, and is considered by many to be the father of Philippine independence. The Revolution According to Raymundo Mata offers an intoxicating blend of fact and fiction, uncovering lost histories while building dazzling, anarchic modes of narrative.

START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by

government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.
