In Japan it's called the "Ghosn Shock"—the stunning arrest of Carlos Ghosn, the jet-setting CEO who saved Nissan and made it part of a global automotive empire. Even more shocking was his daring escape from Japan, packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center, subsisting on rice gruel. This is the saga of what led to the Ghosn Shock and what was left in its wake. Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business, but the alliance's shiny image fronted an unsteady, tense operation. Culture clashes, infighting among executives and engineers, dueling corporate traditions, and government maneuvering constantly threatened the venture. Journalists Hans Greimel and William Sposato

have followed the story up close, with access to key players, including Ghosn himself. Veteran Tokyo-based reporters, they have witnessed the end of Japan's bubble economy and attempts at opening Japan Inc. to the world. They've seen the fraying of keiretsu, Japan's traditional skein of business relationships, and covered numerous corporate scandals, of which the Ghosn Shock and Ghosn's subsequent escape stand above all. Expertly reported, *Collision Course* explores the complex suspicions around what and who was really responsible for Ghosn's ouster and why one of the top executives in the world would risk everything to escape the country. It explains how economics, history, national interests, cultural politics, and hubris collided, crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan. This gripping, unforgettable narrative, full of fascinating characters, serves as part cautionary tale, part object lesson, and part forewarning of the increasing complexity of doing global business in a

nationalistic world.

Events of 2020 Broadway Business Culture has an abiding influence on the way countries and business corporations are governed. This book introduces the reader to the deep philosophies that drive corporations and governments in East Asia, from China through Japan and South Korea to Singapore. With sparkling clarity and spiced with anecdotes and case

studies, it depicts how respect for cultures can lead to spectacular success, or the lack of it to failure. Confucian practices such as guanxi in Chinese society, the benevolent culture of entity firms in Japan, and patriarchal chaebols in South Korea are analyzed with examples like Esquel, Nissan, and Samsung. A delightful chapter on Daoism shows how it drives Jack Ma's Alibaba.com. In the governance of nations, the author reinforces Burke's dictum that systems of government must be consonant with traditional cultures, and he calls out misguided attempts by the West to foist liberal democracies on civilizations in the East where respect for authority and communitarian values come before individual interest. The author advances the novel concept of the meritocratic democracy in which leaders are chosen not by electoral popularity but by proven ability. In a thought-provoking concluding chapter, he evaluates prospective constitutional changes in China that would enshrine meritocratic democracy as an alternative to liberal democracies

that have turned dysfunctional in many Western nations.

Shadow Banks, Ghost Cities, Massive Loans, and the End of the Chinese Miracle Seven Stories Press

A stunning inside look at how and why the foundations upon which China has built the world's second largest economy, have started to crumble. Over the course of a

decade spent reporting on the ground in China as a financial journalist, Dinny McMahon gradually came to the conclusion that the widely held belief in China's inevitable economic ascent is dangerously wrong. In this unprecedented deep dive, McMahon shows how, lurking behind the illusion of prosperity, China's economic growth has been built on a staggering mountain of debt. While stories of newly built but empty cities, white elephant state projects, and a byzantine shadow banking system, have all become a regular fixture in the press in recent years, McMahon goes beyond the headlines to explain how such waste has been allowed to flourish, and why one of the most powerful governments in the world has been at a loss to stop it. Through the stories of ordinary Chinese citizens, McMahon tries to make sense of the unique—and often bizarre—mechanics of the Chinese economy, whether it be the state's addiction to appropriating land from poor farmers; or why a Chinese entrepreneur decided it was cheaper to move his yarn factory to South Carolina; or why

ambitious Chinese mayors build ghost cities; or why the Chinese bureaucracy was able to stare down Beijing's attempts to break up the state's pointless monopoly over the distribution of table salt. Debt, entrenched vested interests, a frenzy of speculation, and an aging population are all pushing China toward an economic reckoning. China's Great Wall of Debt unravels an incredibly complex and opaque economy, one whose fortunes—for better or worse—will shape the globe like never before.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to

Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect.
