Nissan Patrol MQ Series 1980-1987 SAE International
DEVELOPMENTS IN LUBRICANT TECHNOLOGY Examines all stages of Lubricant formulations, production and applications Developments in Lubricant Technology describes the basics of Lubricant formulations and their application in variety of equipment and engines. Divided into twenty chapters, this book provides an introduction to lubricant technology for users, young scientists and engineers desirous of understanding this subject. The book covers all major classes of lubricants including base oils (mineral, chemically modified and synthetic), followed by the description of chemical-additives and their evaluation. A brief chapter on the friction-wear and lubrication has been provided to understand the behaviour of lubricants in equipment. Major industrial oils such as turbine, hydraulic, gear, compressor and metal working fluids have been described. Automotive engine, gear and transmission oils for passenger cars, commercial vehicles, rail-road, marine, natural gas engines and 2T, 4T small engines have been discussed at length with latest specifications and global trends. Various synthetic oils and environmentally friendly products have also been described in the relevant chapters to understand the critical applications of such products in modern equipment and engines. Finally lubricants blending technology, quality control, their storage, handling, re-refining and condition monitoring in equipment have been discussed along with the typical lubricant tests and their significance.

Despite being developed more than 100 years ago, the diesel engine has yet to achieve mass acceptance in the North American passenger car sector. In most other parts of the world, however, diesel engines have made considerable strides due in part to the common rail fuel injection system. Significant fuel economy, reduced exhaust emissions, invincible low-speed torque, and all-around good drivability are a few of the benefits associated with common rail technology, which are covered in-depth in Diesel Common Rail and Advanced Fuel Injection Systems.
