Extracting maximum torque and
horsepower from engines is an art as well as
a science. David Vizard is an engineer and
more aptly an engine building artist who
guides the reader through all the aspects of
power production and high-performance
engine building. His proven high-
performance engine building methods and
techniques are revealed in this all-new
edition of *How to Build Horsepower*. Vizard
goes into extreme depth and detail for
drawing maximum performance from any
automotive engine. The production of power
is covered from the most logical point from
the air entering the engine all the way to
spent gasses leaving through the exhaust.
Explained is how to optimize all the
components in between, such as selecting
heads for maximum flow or port heads for

superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

How to Restore Triumph TR5, TR250 & TR6

Veloce Publishing

How to Restore Triumph TR5, TR250 & TR6 covers all Triumph TR5/250 and TR6 models, and explains the characteristics of the various TR sportscars, what to look out for when purchasing, and how to restore a TR cost-effectively. As well as his own substantial experience and that of other amateur restorers, Roger Williams had the help of

various TR specialists and professional restorers. All this knowledge, allied to substantial photographic coverage, allows him to provide truly detailed coverage of complete restoration and good advice on how to overcome common problems. (Note that the TR5 model was known as the TR250 in the USA.)

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads,

intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. Auto Repair For Dummies, 2nd

Edition (9781119543619) was

previously published as Auto

Repair For Dummies, 2nd Edition

(9780764599026). While this

version features a new Dummies

cover and design, the content is

the same as the prior release and

should not be considered a new or

updated product. The top-selling

auto repair guide--400,000 copies

sold--now extensively reorganized

and updated Forty-eight percent of

U.S. households perform at least

some automobile maintenance on

their own, with women now

accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this

illustrated how-to guide has long been a must and now it's even

better. A complete reorganization now puts relevant repair and

maintenance information directly after each automotive system

overview, making it much easier to find hands-on fix-it instructions.

Author Deanna Sclar has updated systems and repair information

throughout, eliminating discussions of carburetors and adding coverage

of hybrid and alternative fuel vehicles. She's also revised

schedules for tune-ups and oil changes, included driving tips that

can save on maintenance and repair

costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
