Pollution by Nitrogen Oxides  
presents the proceedings of  
the US – Dutch International  
Symposium on Nitrogen  
Oxide, held in Maastricht,  
The Netherlands on May

24 – 28, 1982. This book  
provides research and  
development information  
related to the national and  
international policies on  
nitrogen oxides in the United  
States, The Netherland, Japan,  
and elsewhere in Europe.  
Organized into five sessions  
encompassing 94 chapters,  
this volume begins with an  
overview of the atmospheric  
cycle of nitrogen oxide in  
terms of source strength,  
destruction rates, and  
atmospheric chemistry. This  
text then examines the  
fundamental physical and  
chemical processes involved  
in the formation of nitrogen  
oxides. Other chapters  
consider the regional  
pulmonary deposition of  
nitrogen dioxide in man,  
guinea pigs, rats, and rabbits

of gases in the lungs. This book discusses as well the emission control methods and systems with low nitrogen oxide capability for possible application in The Netherlands and other parts of Europe. This book is a valuable resource for government administrative officials, research scientists, air pollution control experts, and students.

TECHNOLOGY

This book presents the papers from the Internal Combustion Engines: Performance, fuel

---

economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO<sub>2</sub> emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons.

Little Lord Fauntleroy is a novel by the English-American writer Frances Hodgson Burnett, her first children's novel. It was published as a serial in St. Nicholas Magazine from November 1885 to October 1886, then as a book by Scribner's (the publisher of St. Nicholas) in 1886.[2] The illustrations by Reginald B. Birch set fashion trends and the novel set a precedent in copyright law when Burnett won a lawsuit in 1888 against E. V. Seeböhm over the rights to theatrical adaptations of the work
