AB Bookman's Weekly Crescent

The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels, are buried. The key to finding each can be found within the twelve full color paintings and verses of *The Secret*. Yet *The Secret* is much more than that. At long last, you can learn not only the whereabouts of the Fair People's treasure, but also the modern forms and hiding places of their descendants: the Toll Trolls, Maitre D'eamons, Elf Alphas, Tupperwerewolves, Freudian Sylphs, Culture Vultures, West Ghosts and other delightful creatures in the world around us. *The Secret* is a field guide to them all. Many "armchair treasure hunt" books have been published over the years, most

notably *Masquerade* (1979) by British artist Kit Williams. *Masquerade* promised a jewel-encrusted golden hare to the first person to unravel the riddle that Williams cleverly hid in his art. In 1982, while everyone in Britain was still madly digging up hedgerows and pastures in search of the golden hare, *The Secret: A Treasure Hunt* was published in America. The previous year, author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum. Preiss was killed in an auto accident in the summer of 2005, but the hunt for his casques continues.

“ A beautifully written portrait of the people who collect and distribute wild mushrooms . . . food and nature writing at its finest. ” —Eugenia Bone, author of *Mycophilia* “ A rollicking narrative . . . Cook [delivers] vivid and cinematic scenes on every page. ” —The Wall Street Journal In the dark corners of America's forests grow culinary treasures. Chefs pay top dollar to showcase these elusive and enchanting ingredients on their menus. Whether dressing up a filet mignon with smoky morels or shaving luxurious white truffles over pasta, the most elegant restaurants across the country now feature one of nature's last truly wild foods: the uncultivated, uncontrollable mushroom. The mushroom hunters,

by contrast, are a rough lot. They live in the wilderness and move with the seasons. Motivated by Gold Rush desires, they haul improbable quantities of fungi from the woods for cash. Langdon Cook embeds himself in this shadowy subculture, reporting from both rural fringes and big-city eateries with the flair of a novelist, uncovering along the way what might be the last gasp of frontier-style capitalism. Meet Doug, an ex-logger and crabber—now an itinerant mushroom picker trying to pay his bills and stay out of trouble; Jeremy, a former cook turned wild-food entrepreneur, crisscrossing the continent to build a business amid cutthroat competition; their friend Matt, an up-and-coming chef whose kitchen alchemy is turning heads; and the woman who inspires them all. Rich with the science and lore of edible fungi—from seductive chanterelles to exotic porcini—The Mushroom Hunters is equal parts gonzo travelogue and culinary history lesson, a fast-paced, character-driven tour through a world that is by turns secretive, dangerous, and quintessentially American.

This book explores the ways in which the body is sacred in Western medicine, as well as how this idea is played out in questions of life and death, of the autopsy and of the meanings attributed to illnesses and disease. Ritual and religious modifications to, and limitations on what may be done to the body raise cross cultural issues of great complexity philosophically and theologically, as well as sociologically - within medicine and for health care practitioners, but also, as a matter of primary concern for the patient. The book explores the ways in which medicine organises the moral and the immoral, the sacred and the profane; how it mediates cultural concepts of the sacred of the body, of blood and of life and death.
