Namiko Kunimoto explores art, visual culture, and politics in postwar Japan from the 1950s to the 1970s, examining how anxiety and confusion surrounding Japan's new democracy manifested in representations of gender and nationhood in modern art.

Offering many previously unpublished full-color illustrations, Kunimoto shows how contention over Japan's new democracy was expressed, disavowed, and reimagined through representations of the gendered body.

Ghost in the Shell Kodansha Comics
"Language, Nation, Race is an exceptional book. It not only provides a cogent interpretation of Meiji-era linguistic and literary reform movements, but it also productively challenges the current scholarly consensus regarding the meaning of these movements. On top of that, Ueda makes an entirely original and convincing argument about the relevance of 'whiteness' to the understanding of linguistic, aesthetic, and cultural values within these movements." -- James

Reichert, Associate Professor of East Asian Languages and Cultures, Stanford University "A remarkable accomplishment, bound to have a lasting impact in the field of Japan Studies and beyond. Ueda's compelling reading of Meiji period literary and linguistic debates opens new avenues for a philosophical questioning of phoneticism and its significance to the formation of the geopolitical categories of 'West' and 'non-West.'" -- Pedro Erber, author of *Breaching the Frame: The Rise of Contemporary Art in Brazil and Japan*

From the author of *The Art of Inheriting Secrets* comes an emotional new tale of two sisters, an ocean of lies, and a search for the truth. Her sister has been dead for fifteen years when she sees her on the TV news... Josie Bianci was killed years ago on a train during a terrorist attack. Gone forever. It's what her sister, Kit, an ER doctor in Santa Cruz, has always believed. Yet all it takes is a few heart-wrenching seconds to upend Kit's world. Live coverage of a club fire in Auckland has captured the image of a woman stumbling through the smoke and debris. Her resemblance to Josie is unbelievable. And unmistakable. With it comes a flood of emotions--grief, loss, and anger--that Kit finally has a chance to put to rest: by finding the sister who's been living a lie. After arriving in New Zealand, Kit begins her journey with the memories of the past: of days spent on the beach with Josie. Of a lost teenage boy who'd become part of their family. And of a trauma that has haunted Kit and Josie their entire lives. Dekoboko Bittersweet Days Tokyopop Adult Information structure is a relatively new field to linguistics and has only recently been studied for smaller and less described languages. This book is the first of its kind that brings together contributions on information structure in Austronesian languages. Current approaches from formal semantics, discourse studies, and intonational phonology are brought together with language specific and cross-linguistic expertise of Austronesian languages. The 13 chapters in this volume cover all subgroups of the large Austronesian family, including Formosan, Central Malayo-Polynesian, South Halmahera-West New Guinea, and Oceanic. The major focus, though, lies on Western Malayo-Polynesian languages. Some chapters investigate two of the largest languages in the region (Tagalog and different varieties of Malay), others study information-structural phenomena in small, underdescribed languages. The three overarching topics that are covered in this book are NP marking and reference tracking devices, syntactic structures and information-structural categories, and the interaction of information structure and prosody. Various data types build the basis for the different studies compiled in this book. Some chapters investigate written texts, such as modern novels (cf. Djenar's chapter on modern, standard Indonesian), or compare different text genres, such as, for example, oral narratives and translations of biblical narratives (cf. De Busser's chapter on Bunun). Most contributions, however, study natural spoken speech and make use of spoken corpora which have been compiled by the authors themselves. The volume comprises a number of different methods and theoretical frameworks. Two chapters make use of the Question Under Discussion approach, developed in formal semantics (cf. the chapters by Latrouite & Riester; Shiohara & Riester). Riesberg

et al. apply the recently developed method of Rapid Prosody Transcription (RPT) to investigate native speakers' perception of prosodic prominences and boundaries in Papuan Malay. Other papers discuss theoretical consequences of their findings. Thus, for example, Himmelman takes apart the most widespread framework for intonational phonology (ToBI) and argues that the analysis of Indonesian languages requires much simpler assumptions than the ones underlying the standard model. Arka & Sedeng ask the question how fine-grained information structure space should be conceptualized and modelled, e.g. in LFG. Schnell argues that elements that could be analysed as "topic" and "focus" categories, should better be described in terms of 'packaging' and do not necessarily reflect any pragmatic roles in the first place.
