Developed by Alexander Dennis in 2005 as an all-encompassing replacement for the Dennis Trident and its two bodies, the Plaxton President and Alexander ALX400, the integral Enviro400, immediately sold in large numbers, not least to London operators, which in the next eight years bought over 1,500 of them. Late in the production run, the hybrid E40H was introduced and also made good headway in London, funded largely by environmental grants. Nearly 300 of these are in service in London. Valid to May 2015, this book finishes by introducing the MMC, the all-new development of the Enviro400 unveiled in 2014 and exemplified in London so far by two batches for Abellio and Metroline.

**Communities Dominate Brands** Packt Publishing Ltd

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. Communities Dominate Brands discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. Communities Dominate Brands addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new

---

element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, Communities Dominate Brands arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. Communities Dominate Brands covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. Communities Dominate Brands analyses early successes of engaging communities by global brands such as

Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, Communities Dominate Brands is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Does it have to be this way? Can't resist checking your smartphone or mobile device? Sure, all this connectivity keeps you in touch with your team and the office—but at what cost? In *Sleeping with Your Smartphone*, Harvard Business School professor Leslie Perlow reveals how you can disconnect and become more productive in the process. In fact, she shows that you can devote more time to your personal life and accomplish more at work. The good news is that this doesn't require a grand organizational makeover or buy-in from the CEO. All it takes is collaboration between you and your team—working together and making small, doable changes. What started as an experiment with a six-person team at The Boston Consulting Group—one of the world's elite management consulting firms—triggered a global initiative that eventually spanned more than nine hundred BCG teams in thirty countries across five continents. These teams confronted their nonstop workweeks and changed the way they worked, becoming more efficient and effective. The result? Employees were more satisfied with

their work-life balance and with their work in general. And the firm was better able to recruit and retain employees. Clients also benefited—often in unexpected ways. In this engaging book, Perlow takes you inside BCG to witness the challenges and benefits of disconnecting. She provides a step-by-step guide to introducing change on your team—by establishing a collective goal, encouraging open dialogue, ensuring leadership support—and then spreading change to the rest of your firm. If you and your colleagues are grappling with the “always on” problem, it's time to disconnect—and start reading.
