The Great Game of Business started a business revolution by introducing the world to open-book management, a new way of running a business that created unprecedented profit and employee engagement. The revised and updated edition of The Great Game of Business lays out an entirely different way of running a company. It wasn't dreamed up in an executive think tank or an Ivy League business school or around the conference table by big-time consultants. It was forged on the factory floors of the heartland by ordinary folks hoping to figure out how to save their jobs when their parent company, International Harvester, went down the tubes. What these

workers created was a revolutionary approach to market power and anticompetitive conduct in digital management that has proven itself in every industry around the world for the past thirty years—an approach that is perhaps the last, best hope for reviving the American Dream.

In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google, and their business practices to determine how their power affects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they are adequate to address

market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies as well as from third parties—totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online—including on the free and diverse press, innovation, and privacy—and a final hearing to examine potential solutions to concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief Executive Officers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digital markets in anticompetitive and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether

they believe they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices has revealed common problems
