"There is no question that David Harvey's work has been one of the most important, influential, and imaginative contributions to the development of human geography since the Second World War. . . . His readings of Marx are arresting and original--a remarkably fresh return to the foundational texts of historical materialism."--Derek Gregory, author of *Geographical Imaginations*

On Thursday, July 13, 1995, Chicagoans awoke to a blistering day in which the temperature would reach 106 degrees. The heat index, which measures how the temperature actually feels on the body, would hit 126 degrees by the time the day was over. Meteorologists had been warning residents about a two-day heat wave, but these temperatures did not end that soon. When the heat wave broke a week later, city streets had buckled; the records for electrical use were shattered; and power grids had failed, leaving residents without electricity for up to two days. And by July 20, over seven hundred people had perished-more than twice the number that died in the Chicago Fire of 1871, twenty times the number of those struck by Hurricane Andrew in 1992—in the great Chicago heat wave, one of the deadliest in American history. Heat waves in the United States kill more people during a typical year than all other natural disasters combined. Until now, no one could explain either the overwhelming number or the heartbreaking manner of the deaths resulting from the 1995 Chicago heat wave. Meteorologists and medical scientists have been unable to account for the scale of the trauma, and political officials have puzzled over the sources of the city's vulnerability. In *Heat Wave*, Eric Klinenberg takes us inside the anatomy of the metropolis to conduct what he calls a "social autopsy," examining the social, political, and institutional organs of the city that made this urban disaster so much worse than it ought to have been. Starting with the question of why so many people died at home alone, Klinenberg investigates why some neighborhoods experienced greater mortality than others, how the city government responded to the crisis, and how journalists, scientists, and public officials reported on and explained these events. Through a combination of years of fieldwork, extensive interviews, and archival research, Klinenberg uncovers how a number of surprising and unsettling forms of social breakdown—including the literal and social isolation of seniors, the institutional abandonment of poor neighborhoods, and the retrenchment of public assistance programs—contributed to the high fatality rates. The human catastrophe, he argues, cannot simply be blamed on the failures of any particular individuals or organizations. For when hundreds of people die behind locked doors and sealed windows, out of contact with friends, family, community groups, and public agencies, everyone is implicated in their demise. As Klinenberg demonstrates in this incisive and gripping account of the contemporary urban condition, the widening cracks in the social foundations of American cities that the 1995 Chicago heat wave made visible have by no means subsided as the temperatures returned to normal. The forces that affected Chicago so disastrously remain in play in America's cities, and we ignore them at our peril. For the Second Edition Klinenberg has added a new Preface showing how climate change has made extreme weather events in urban centers a major challenge for cities and nations across our planet, one that will require commitment to climate-proofing changes to infrastructure rather than just relief responses.

*Photography and the Non-Place* Springer  
Tourists climb the Eiffel Tower to see Paris. Parisians know that to really see the city you must descend into the metro. In this revelatory book, Marc Auge takes readers below Paris in a work that is both an ethnography of the city and a personal narrative. Guiding us through history, memory, and physical space, Auge juxtaposes the romance of the metro with the reality of multiethnic urban France. His work is part autobiography, with impressions from a lifetime riding the trains; part meditation on self and memory reflected in the people and places underneath Paris; part analysis of a place where the third world and the first world meet, where remnants of cultures move and press together; and part a reflection on anthropology in an era of globalization and urban development. Although he is a pillar of French thought, In the Metro is Auge's first major critical and creative work translated into English. It shows him to be firmly rooted in a tradition of literary ethnography that reaches back to Claude Levi-Strauss and Michel de Certeau, but also engaged in current theoretical debates in literary and cultural studies. In Auge's idiosyncratic and innovative approach, the act of observing the quotidian is elevated to an art. The writer and his history become part of the field he observes, and anthropology interacts with a site -- urban life -- usually reserved for sociology and cultural studies. Throughout, Auge reveals a passion for his milieu, seeing the metro as a place rich with history and literature -- an eclectic egalitarian society.

**The Negro Motorist Green Book** Lulu.com  
The concept of Third Culture Kids is often used to describe people who have spent their childhood on the move, living in many different countries and languages. This book examines the hype, relevance and myths surrounding the concept while also redefining it within a broader study of transnationality to demonstrate the variety of stories involved.

Springer  
This book presents a critical and aesthetic defence of “non-place” as an act of cultural reclamation. Through the restorative properties of photography, it re-conceptualises the cultural significance of non-place. The non-place is often referred to as “wasteland”, and is usually avoided. The sites investigated in this book are located where access and ownership are often ambiguous or in dispute; they are places of cultural forgetting. Drawing on the author’s own photographic research-led practice, as well as material from photographers such as Ed Ruscha, Joel Sternfeld and Richard Misrach, this study employs a deliberately allusive intertextuality to offer a unique insight into the

contested notions surrounding landscape representation. Ultimately, it argues that the non-place has the potential to reveal a version of England that raises questions about identity, loss, memory, landscape valorisation, and, perhaps most importantly, how we are to arrive at a more meaningful place.

*Spaces of Hope* Verso  
Witness the French anthropologist as we have never seen him before. Marc Augé coined the term “non-place” to describe the ubiquitous airports, hotels, and motorways filled with anonymous individuals. In this new book, he casts his anthropologist’s eye on a subject close to his heart: cycling. With *In Praise of the Bicycle*, Augé takes us on a two-wheeled ride around our cities and on a personal journey into ourselves. We all remember the thrill of riding a bike for the first time and the joys of cycling. Here he reminds us that these memories are not just personal, but rooted in a time and a place, in a history that is shared with millions of others. Part memoir, part manifesto, Augé’s book celebrates cycling as a way of reconnecting with the places in which we live, and, ultimately, as a necessary alternative to our disconnected world.

**No Fixed Abode** John Wiley & Sons  
Best-selling author James Green shares his own ground-breaking 6-step formula for producing top quality, highly successful non-fiction books in just 24 hours. 24 Hour Bestseller: How to Write a Book in 24 Hours will provide you with a 6-step writing blueprint that you can set on full 'rinse and repeat mode' providing you with a step-by-step recipe for writing success. After becoming disillusioned with his own writing struggles, the author decided to completely re-engineer the entire process, providing a plan for: generating and validating new book ideas; creating comprehensive book outlines; writing in a quick, easy and enjoyable way; publishing the completed books effortlessly. Inside 24 Hour Bestseller, you will learn: How to stir your creative juices to constantly think up new book ideas; How to validate and evaluate your ideas for maximum profit; How to create a solid book outline that will make the writing process a breeze; How to turn your writing into a fun game; How to stay motivated; When to outsource (and when not to); How to craft your book title and description for maximum impact; How to publish your book to KDP easily; Book pricing strategies; And much more... If you've become overwhelmed and disillusioned with the whole writing process, this book will be your guide and your tonic, re-energizing your authoring efforts. You'll be more productive than ever, and most importantly, you will find writing enjoyable once again! Whether you're a complete novice and have never even written a book before, are struggling to come up with new book ideas, or are a seasoned author who simply needs some tips on how to write more effectively, then this book is for you. 24 Hour Bestseller will guide you step-by-step through the entire formula and get you authoring for success once more!"

*Teaching Space, Place, and Literature* SAGE  
While geography is not the only factor to shape human behavior, its influence on terrorists motivations, behaviors, options, and activities is a primary consideration in understanding terrorism. Taking a different approach than many other books on terrorism, *The Geography of International Terrorism: An Introduction to Spaces and Places of Violent Everyone Dies Young* Vintage  
This text introduces students of human geography to the fundamental concept of place, marrying everyday uses of the term with the complex theoretical debates that have grown up around it. A short introduction to one of the most fundamental concepts in human geography Marries everyday uses of the term "place" with the more complex theoretical debates that have grown up around it Makes the debates intelligible to students, using familiar stories as a way into more abstract ideas Excerpts and discusses key papers on place by Doreen Massey and David Harvey Considers empirical examples of ways in which the concept of place has been used in research Teaching and learning aids include an annotated bibliography, lists of key readings and texts, a survey of web resources, suggested pedagogical resources and possible student projects

*Non-places* MIT Press  
In the 25 years since its original publication, *Space and Place* has not only established the discipline of human geography, but it has proven influential in such diverse fields as theater, literature, anthropology, psychology, and theology. Eminent geographer Yi-Fu Tuan considers the ways in which people feel and think about space, how they form attachments to home, neighborhood, and nation, and how feelings about space and place are affected by the sense of time. He suggests that place is security and space is freedom: we are attached to the one and long for the other. Whether he is considering sacred versus "biased" space, mythical space and place, time in experiential space, or cultural attachments to space, Tuan's analysis is thoughtful and insightful.

**Space, Place and Gender** University of Chicago Press  
This book analyzes the hermeneutics of place, raising questions about central issues such as textuality, dialogue, and play. It discusses the central figures in the development of hermeneutics and place, and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful. It covers the range of philosophical hermeneutic theory, both within philosophy itself as well as from other disciplines. In doing so, the volume reflects the state of theorization on these issues, and also looks forward to the implications and opportunities that exist. Philosophical hermeneutics has fundamentally altered philosophy’s approach to place. Issues such as how we dwell in place, how place is imagined, created, preserved, and lost, and how philosophy itself exists in place have become central. While there is much research applying hermeneutics to place, there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place. This book fills that void by offering a sustained analysis of the central elements, major figures, and disciplinary applications of hermeneutics and place.

*Giphantia* Springer  
"We are awash in time, savoring a few moments of it; we project ourselves into it, reinvent it, play with it; we take our time or let it slip away: it is the raw material of our imagination. Age, on the other hand, is the detailed account of the days that pass, the one-way view of the years whose total sum when set forth can stupefy us. Age wedges each of us between a date of birth that, at least in the West, we know for

certain and an expiration date that, as a general rule, we would like to defer. Time is a freedom, age a constraint." Marc Augé remembers his beloved childhood cat, who seemed to grow wise with age, though her essential nature remained unchanged. He considers our belief that objects mature, when it is our perception of them that evolves over time. He wonders why public demonstrations of affection between the elderly make the young so uncomfortable and why we torture ourselves with regret at what might have been. Time can be liberating, he finds; it is a resource we can squander or relish. Yet age is a burden, bound by our personal and cultural neuroses. With an ethnologist's understanding of construct and practice, Augé isolates age from the development of consciousness, desire, and representations of the self. In bold, eye-opening strokes, he casts age as a physical marker and treats one's youthful approach to the world as the true measure of life's value.

*Age Inclusive Public Space* Verso Books

An ever-increasing proportion of our lives is spent in supermarkets, airports and hotels, on motorways or in front of TVs, computers and cash machines. This invasion of the world by what Marc Augé calls "non-space" results in a profound alteration of awareness: something we perceive, but only in a partial and incoherent manner. Augé uses the concept of "supermodernity" to describe a situation of excessive information and excessive space. In this fascinating essay he seeks to establish an intellectual armature for an anthropology of supermodernity.

*Algorithms of Oppression* U of Minnesota Press

In recent years, social workers have raised a new concern about the appearance of a new category among the working poor. Even employed, there are people so overburdened by the cost of living and so under compensated that they cannot afford a place to sleep. Contrary to popular opinion, according to the website for the Coalition for the Homeless, forty-four percent of the homeless in first world countries actually have jobs. In *No Fixed Abode*, Marc Augé's pathbreaking ethnofiction--a fictional ethnography--a man named Henri narrates his strange existence in the margins of Paris. By day he walks the streets, lingers in conversation with the local shopkeepers, and sits writing in cafés, but at night he takes shelter in an abandoned house. From here, we see a progressive erosion of Henri's identity, a loss of bearings, and a slow degeneration of his ability to relate to others. But then he meets the artist Dominique, whose willingness to share her life with him raises questions about who he has become and about what a person needs in order to be a part of society. This is a book about how we live in geographical space and how work and patterns of domicile affect our status and our inner being. Despite the apparent simplicity of the fictional premise, Augé's book asks serious questions about the nature of our culture.

*For Space* MIT Press

Space, place and mapping have become key concepts in literary and cultural studies. The transformational effects of postcolonialism, globalization, and the rise of ever more advanced information technologies helped to push space and spatiality into the foreground, as traditional spatial or geographic limits are erased or redrawn. *Teaching Space, Place and Literature* surveys a broad expanse of literary critical, theoretical, historical territories, as it presents both an introduction to teaching spatial literary studies and an essential guide to scholarly research. Divided into sections on key concepts and issues; teaching strategies; urban spaces; place, race and gender and spatiality, periods and genres, this comprehensive book is the ideal way to approach the teaching of space and place in the humanities classroom.

*In the Metro* Columbia University Press

An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often explained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. *The Art of Failure* is essential reading for anyone interested in video games, whether as entertainment, art, or education.

*Orientalism* Verso Books

The lives of second-generation Algerians in a Paris housing project, the basis of the award-winning film. "Writing that is both dazzling and economical and a moral and aesthetic elegance that does not judge. The greatest attribute of this extraordinary first novel is its thirst for life."--*Le Quotidien de Paris*  
**Sandfuture** Reaktion Books

An account of the life and work of the architect Minoru Yamasaki that leads the author to consider how (and for whom) architectural history is written. *Sandfuture* is a book about the life of the architect Minoru Yamasaki (1912–1986), who remains on the margins of history despite the enormous influence of his work on American architecture and society. That Yamasaki's most famous projects—the Pruitt-Igoue apartments in St. Louis and the original World Trade Center in New York—were both destroyed on national television, thirty years apart, makes his relative obscurity all the more remarkable. *Sandfuture* is also a book about an artist interrogating art and architecture's role in culture as New York changes drastically after a decade bracketed by terrorism and natural disaster. From the central thread of Yamasaki's life, *Sandfuture* spirals outward to include reflections on a wide range of subjects, from the figure of the architect in literature and film and transformations in the contemporary art market to the perils of sick buildings and the broader social and political implications of how, and for whom, cities are built. The result is at once sophisticated in its understanding of material culture and novelistic in its telling of a good story.

*Space and Place* John Wiley & Sons

Human Rights is an introductory text that is both innovative and challenging. Its unique interdisciplinary approach invites students to think imaginatively and rigorously about one of the most important and influential political concepts of our time. Tracing the history of the concept, the book shows that there are fundamental tensions between legal, philosophical and social-scientific approaches to human rights. This analysis throws light on some of the most controversial issues in the field: Is the idea of the universality of human rights consistent with

respect for cultural difference? Are there collective human rights? What are the underlying causes of human-rights violations? And why do some countries have much worse human-rights records than others? The third edition has been substantially revised and updated to take account of recent developments, including the ‘Arab Spring’, the civil war in Syria, the refugee crisis, ISIS and international terrorism, and climate change politics. Widely admired and assigned for its clarity and comprehensiveness, this book remains a ‘go-to’ text for students in the social sciences, as well as students of human-rights law who want an introduction to the non-legal aspects of their subject.
