****WINNER OF THE 2020 NOBEL PRIZE IN PHYSICS**** The Road to Reality is the most important and

ambitious work of science for a generation. It provides nothing less than a comprehensive account of the physical universe and the essentials of its underlying mathematical theory. It assumes no particular specialist knowledge on the part of the reader, so that, for example, the early chapters give us the vital mathematical background to the physical theories explored later in the book. Roger Penrose's purpose is to describe as clearly as possible our present understanding of the universe and to convey a feeling for its deep beauty and philosophical implications, as well as its intricate logical interconnections. The

Road to Reality is rarely less than challenging, but the book is leavened by vivid descriptive passages, as well as hundreds of hand-drawn diagrams. In a single work of colossal scope one of the world's greatest scientists has given us a complete and unrivalled guide to the glories of the universe that we all inhabit. 'Roger Penrose is the most important physicist to work in relativity theory except for Einstein. He is one of the very few people I've met in my life who, without reservation, I call a genius' Lee Smolin

Take One's Essential Guide to Canadian Film is the most exhaustive and up-to-date reference book on Canadian film and filmmakers, combining 700 reviews and biographical listings with a detailed chronology of major events in Canadian film and television history.

Compiled by Wyndham Wise, the editor and publisher of Take One, Canada's most respected film magazine, with a foreword by Canadian director Patricia Rozema, this is the only reference book of its kind published in English. Each film title is listed with credits, a mini review,

and significant awards. Biographical listings of directors, producers, actors, writers, animators, cinematographers, distributors, exhibitors, and independent filmmakers are accompanied by date and place of birth, date of death if applicable, a brief career overview,

and a filmography. Wise celebrates Canadian achievement on both a national and international scale, and juxtaposes the distinctly Canadian with Canada's exports to Hollywood: Maury Chaykin and Jim Carrey, John Candy and William Shatner, Mon Oncle Antoine and Porky's,

Highway 61 and Meatballs, The Red Violin and The Art of War. From great early Hollywood stars like Walter Huston, Fay Wray, Mary Pickford, Norma Shearer, and Marie Dressler, to our current crop of star directors - including Patricia Rozema, Atom Egoyan, David Cronenberg, Denys
