Criminal Law in Zambia Athabasca University Press

Online version of MIT Press book has brief overview of book's content and provides links to open access PDF version of ebook, as well as an iPaper version and a link to the MIT Press store for buying the print version. In this collection of essays the authors who are leaders in open education, explore the potential of open education to transform the economics and ecology of education. The authors argue that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs. Ten Thousand Light-years from Home JAI Press Incorporated Blended learning is firmly established in universities around the world, yet to date little attention has been paid to how students are engaging with this style of learning. Presenting a theoretically-based and empirically-validated model of engagement, this book examines the application of the model to improve the quality and productivity of university education.

Covering the key qualities of blended learning, it analyses how online learning influences campus-based education, develops the student perspective of online learning, examines online learning systems as agents of change, provides insights and guidance for educational developers and administrators attempting to improve quality of learning, and considers how institutions can maximise educational returns from large investments in online learning technologies. Illustrated with case studies and developing ideas for practice, this book will be valuable reading for researchers and developers keen to improve their understanding of the emerging dynamics of contemporary student engagement with online learning.

"Showing how science is limited by its dominant mode of investigation, Lincoln and Guba propose an alternative paradigm--a "naturalistic" rather than "rationalistic" method of inquiry--in which the investigator avoids manipulating research outcomes. A "paradigm shift" is under way in many fields, they contend, and go on to describe the different assumptions of the two approaches regarding the nature of reality, subject-object interaction, the possibility of generalization, the concept of causality, and the role of values. The authors also offer guidance for research in the field (where, they say, naturalistic inquiry always takes place). Useful tips are given, for example, on "designing" a study as it unfolds, establishing "trustworthiness," and writing a case report. This book helps researchers "both to understand and to do naturalistic inquiry." Of particular interest to educational researchers, it is valuable for all social scientists involved with questions of qualitative and quantitative methodology."--Publisher's description.

Legal Process SAGE

In this unique guide to Britain's megalithic culture, rock n' roller Julian Cope provides an inspired fusion of travel, history, poetry, maps, field notes, and pure passion.

Student Engagement in Campus-Based and Online Education

Taylor & Francis

Answering a long-felt need for a comprehensive English-Xhosa dictionary, this work has been compiled to meet the needs of both Xhosa-speakers learning English, and English-speakers learning Xhosa. Plus: a guide to Xhosa noun classes in the front of the dictionary helps you understand a vital part of Xhosa grammar and how to use your dictionary effectively. Around 15,000 entries comprehensively cover everyday, technical and subject-specific English. The class system of Xhosa nouns is clearly shown to help you avoid making grammar mistakes.

Introduction to Policing JHU Press

Guideline 12: If the Results of Previous Studies Are Inconsistent or Widely Varying, Cite Them Separately

Advances in Motivation and Achievement National Academies Press
Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

Endnotes 3 HarperThorsons

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

Pedagogy in Poverty Springer

Why solving ongoing problems with the NQF (National Qualifications Framework) matters -- The challenges unemployment imposes on youth -- The challenge of youth-to-work transitions: an international perspective -- A statistical overview of further education and training colleges -- Strengthening the capacity of FET Colleges to meet the needs of young people -- Higher education and an expanded post-school educational system -- Trends in training in South Africa -- Key issues in the assessment of South Africa's national skills development strategy -- Opening the doors of learning? Viewing the post-school education and training landscape from a youth perspective.

Documents and Discussion: Livestock products MIT Press

As South Africa transitioned from apartheid to democracy, changes in the political landscape, as well as educational agendas and discourse on both a national and international level, shaped successive waves of curriculum reform over a relatively short period of time. Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes, *Pedagogy in Poverty* explores the potential of curricula to improve education in developing and emerging economies worldwide, and, ultimately, to reduce inequality. Incorporating detailed, empirical accounts of life inside South African

classrooms, this book is a much-needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools. Classroom-level responses to curriculum policy reforms reveal some implications of the shifts between a radical, progressive approach and traditional curriculum forms. Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy, and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling. Offering a data-rich historical sociology of curriculum and pedagogic change, this book will appeal to academics, researchers and postgraduate students in the fields of education, sociology of education, curriculum studies, educational equality and school reform, and the policy and politics of education.

Through the Eyes of an African Chef National Academies Press
Covers chapters on different theoretical perspectives in motivation research. This work provides an overview of the social cognitive motivational theories and the issues that these models and perspectives are confronting at the edge of motivational science. It includes chapters such as self-efficacy theory, self-concept theory, and others.

Writing Research Papers Routledge

This book reports on the 13th International Workshop on Railway Noise (IWRN13), held on September 16-20, 2019, in Ghent, Belgium. It gathers original peer-reviewed papers describing the latest developments in railway noise and vibration, as well as state-of-the-art reviews written by authoritative experts in the field. The different papers cover a broad range of railway noise and vibration topics, such as rolling noise, wheel squeal,

noise perception, prediction methods, measurements and monitoring, and vehicle interior noise. Further topics include rail roughness, rail corrugation and grinding, high-speed rail and aerodynamic noise, structure-borne noise, ground-borne noise and vibration, and resilient track forms. Policy, criteria and regulation are also discussed. Offering extensive and timely information to both scientists and engineers, this book will help them in their daily efforts to identify, understand and solve problems related to railway noise and vibration, and to achieve the ultimate goal of reducing the environmental impact of railway systems.

Writing Literature Reviews Springer Science & Business Media

Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

Mbongeni Ngema's Sarafina! African Minds

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force — make this bestselling book a must-have for policing courses.

STEM Integration in K-12 Education examines current efforts to connect the STEM disciplines in K-12 education. This report identifies and characterizes existing approaches to integrated STEM education, both in formal and after- and out-of-school settings. The report reviews the evidence for the impact of integrated approaches on various student outcomes, and it proposes a set of priority research questions to advance the understanding of integrated STEM education. STEM Integration in K-12 Education proposes a framework to provide a common perspective and vocabulary for

researchers, practitioners, and others to identify, discuss, and investigate specific integrated STEM initiatives within the K-12 education system of the United States. *STEM Integration in K-12 Education* makes recommendations for designers of integrated STEM experiences, assessment developers, and researchers to design and document effective integrated STEM education. This report will help to further their work and improve the chances that some forms of integrated STEM education will make a positive difference in student learning and interest and other valued outcomes.

Quantitative Methods for Business Decisions

Higher education in post-apartheid South Africa was always likely to attract academic interest, and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions, and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines - from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy-makers working in higher education, and anyone else with a stake in managing cultural diversity in education.
