A Handbook for the Art and Science of Teaching  
Independently Published

In A Handbook for the Art and Science of Teaching, Robert J. Marzano and John L. Brown help you explore and refine your instructional strategies, always with the goal of enhancing student achievement. As a companion volume to Marzano's The Art and Science of Teaching, the handbook is intended to be a guide for individual teachers, study groups, and professional developers working together to improve their teaching. It is organized into 25 modules, each related to one of the 10 design questions introduced in the earlier book. Each module begins with a series of reflection questions and concludes with a set of self-assessment questions that allow the reader to determine areas that might need further work. At the heart of each module are specific strategies for addressing the

---

key components of effective teaching. Dozens of examples illustrate the strategies in action in elementary and secondary classrooms, in all subject areas. The strategies provide a thorough grounding in the science of teaching. How a teacher chooses to implement them constitutes the art of teaching. Both elements are necessary for improving student achievement and creating successful schools. For anyone committed to developing a wide range of teaching skills, this handbook is a welcome road map to best practices.

Improve your retention by activating the right and left side of your brain while taking notes. The left page is college-ruled which compliments the logical and verbal left brain. The right page is blank which compliments your creative right brain. Take notes on the left side and draw on the right side for whole brain activation while you learn. Includes 12-month habit tracker at the beginning of the notebook. To get the best out of your learning, you need to develop good habits like proper diet, exercise, and even cold showers. Cover design a nod to Jim Kwik's work on memorizing the first 10 elements on the periodic table.
