The subtitle is From Absolute Nothing to Cosmic Oblivion. It's a history of the number zero, how medieval Europe struggled with the existential crisis that such a number would create. It's about zero as a mathematical concept and a physical number, its importance to astronomy, to physics and to science in general.

When people asked me what I was reading, I really enjoyed saying I 've been reading ' Nothing ' ! Brilliant book and a great little read. Encompasses all sorts of ' nothings ' from the power of the placebo effect, the Big Bang, the power of the mind in healing, black holes, vacuums, absolute zero, lazy animals and what the brain is really doing when it ' s doing ' Nothing ' .
