Natural disasters are often multifaceted and cause severe damage. Disasters initiated locally can become national and even global crises. Today's world urgently needs a new body of knowledge and techniques for the mitigation of and response to disaster. Central to such a body of knowledge are disaster preparedness, emergency and crisis management systems of government, of which capacity building is becoming an increasingly important element in public administration, management and governance. Today, disasters are to be managed by sound local, national, and global governance, through all the phases of preparedness, prevention, mitigation and then to relief, recovery and re-construction. During all these phases, government plays the most important role. This book provides a case of the disaster governance of Japan, by presenting information and analyses on what happened in the Magnitude 9 Great East Japan Earthquake that caused the huge tsunami and the INES Level 7 Fukushima nuclear power plants accidents on March 11, 2011. In examining this Japanese case study, this book illustrates the socio-economic damage of the stricken areas together with the overall picture of the disasters. It examines Japan's capacity for disaster governance and its crisis management system in response to the most devastating disaster that the country has ever encountered since the end of WWII. It also offers preliminary findings learned from this experience in the Japan's public administration and governance systems, challenged to be more

accountable and transparent during the recovery and reconstruction efforts now in progress.

How will China develop under the new leadership of Xi Jinping and Li Keqiang? This is a key question for both China and the wider world. This book presents a comprehensive overview of the key areas and issues, assessing how things are likely to develop under the new leadership. It considers the economy, trade, politics, and demographics; appraises the leadership, both at the national and provincial levels; and discusses potential flashpoints in China's relationship with its neighbors and China's emerging role in world politics. The book emphasizes the great uncertainties surrounding the next phase of China's development, highlighting the structural problems of the economy, the problems of urbanization and governance, and the deep social cleavages which exist over issues such as income disparity, rampant corruption and unequal opportunities in social mobility. Against this backdrop it measures the emerging leadership of Xi Jinping to assess

the prospects for China in the next decade and beyond.

What is the best way to promote human rights in grossly repressive states when neither sanctions nor trade and investment have much effect? This book examines the concept of Principled Engagement as an often overlooked alternative strategy for alleviating human rights violations and improving the framework of human rights protection. Beginning with an explanation of the concept and a comparison with the alternatives of Ostracism and Business as Usual, the book argues that Principled Engagement deserves greater attention and explains how it works and what factors contribute to its success or failure. Case studies provide a rare scholarly inquiry into the effectiveness of the basic underlying ideas and analyse and assess specific cases, including from China, Burma, Zimbabwe and Liberia. Written by leading academics and practitioners, the book takes a general, comparative approach to human rights policy that teases out broad lessons about what works. Ultimately, this is a study that challenges scholars and practitioners alike to take a fresh look at how human rights are promoted internationally.

The book aims to initiate a sustainable use of land and water resources in Central Asia by the transfer of scientific methods. It deals with the most advanced methods worldwide for better monitoring and management of water and land resources. We offer an array of methods of measuring, assessing, forecasting, utilizing and controlling processes in agricultural landscapes. These are laboratory and field measurement methods, methods of resource evaluation, functional mapping and risk assessment, and remote sensing methods for monitoring and modeling large areas. The book contains methods and results of data analysis and ecosystem modeling, of bioremediation of soil

and water, field monitoring of soils, and methods and technologies for optimizing land use systems as well. The chapter authors are inventors and advocates of novel transferrable methods. The book starts with an analysis of the current state of water and land resources. Finally concrete proposals for the applicability of novel methods are given.

Why does North Korea routinely turn to provocation to achieve foreign policy goals? Are the actions of the volatile Kim regime predictable, based on logical responses to the conditions faced by North Korea? This book, an examination of the "Hermit Kingdom" over the past 50 years, explains why the Democratic People's Republic of Korea uses hostility and coercion as instruments of foreign policy. Using three case studies and quantitative analysis of more than 2,000 conflict events, the author explores the relationship between North Korea's societal conditions and its propensity for external conflict. These findings are considered in light of diversionary theory, the idea that leaders use external conflict to divert attention from domestic affairs. Analyzing the actions of an isolated state such as North Korea provides a template for conflict scholarship in general.

This book explores the impacts of global economic, political and

cultural shifts on various international legal frameworks and legal norms. The economic growth of states throughout Asia, South and Central America and Africa is having a profound effect on the dynamics of international relations, with a resulting impact on the operation and development of international law. This book examines the influence of emerging economies on international legal rules, institutions and processes. It describes recent and predicted changes in economic, political and cultural powers, flowing from the growth of emerging economies such as China, India, Brazil, South Africa and Russia, and analyses the influence of these changes on various legal frameworks and norms. Expert contributors drawn from a variety of fields, including international law, politics, environmental law, human rights, economics and finance, provide a broad analysis of the nature of the shifting global dynamic in its historical and contemporary contexts, and a range of perspectives on the impact of these changes as they relate to specific regimes and issues, including climate change regulation, collective security, indigenous rights, the rights of women and girls, environmental protection and foreign aid and development. The book provides a fresh and comprehensive analysis of an issue with extensive implications for international law and politics. *Shifting Global Powers and International Law* will be of interest to students and scholars of international relations; international law; international political economy, human rights; and development. *Study Guide for CTET Paper 2 (Class 6 - 8 Teachers) Mathematics/ Science with Past Questions* Routledge

Non-Western Encounters with Democratization offers diverse perspectives on democracy and transition spanning the Middle East and North Africa to East Asia. This unique collection of essays, drawn from contextually rich case studies presents readers with a variety of non-western encounters with democracy and provides important insights into the dramatic political and social transformations in these regions over the past decades. The book offers a deeper understanding of democratization and challenges the image of western democracy as a universal model to which non-western societies aspire. Taking the events of the Arab

Spring as the starting point, international contributors look at why the uprisings that rapidly spread across North Africa and the Middle East had a strong resonance in East Asia but failed to inspire similar revolts. Through direct engagement with non-western experiences of political transition the book demonstrates a unique coherence across two regions relatively under explored in democratization literature.

In *Creativity and Chaos: Reflections on a Decade of Progressive Change in Public Schools, 1967 – 1977*, Charles Suhor brings to life the bold challenges to the status quo in education during a decade of national turmoil. The regimentation and rote learning of traditional schooling could not have escaped the restless temper of the times Vietnam war protests, racial strife, assassinations, hippie communes, the sexual revolution, an emerging drug culture, and daring innovations in pop/rock music. Suhor describes his immersion in post-World War II popular culture of New Orleans as a rich backdrop for his years as an impassioned educational reformer at local and national levels. A risk-taking teacher and district supervisor of English, he plunged headlong into controversies over black literature, censorship, ebonics, the "new

grammar," faculty integration, testing, standardization, and computer technology. He demonstrates how the sweeping national trends often took quirky, distinctive turns in a city that delights in marching to a different drummer. Suhor's engaging account takes the reader into classrooms as well as the intrigues of central office politics and national leaders' disputes on how to best teach students in a time of change. In no sense a doctrinal liberal, he lambastes the errors and excesses of the progressive movement and traces its decline and the backlash demand for a return to basic skills. Suhor concludes with an update on innovations that have waned or persisted in today's schools.

*The Routledge Handbook of International Environmental Law* is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law (IEL). The Handbook features specially commissioned papers by leading experts in the field of international environmental law, drawn from a range of both developed and developing countries in order to put forward a truly global approach to the subject. Furthermore, it addresses emerging and cross-cutting issues of critical importance for the years ahead. The book is split into six parts for ease of reference: *The Legal Framework, Theories and Principles of International Environmental Law* - focuses on the origins, theory, principles and development of the discipline; *Implementing International Environmental Law* - addresses the implementation of IEL and the role of various actors and institutions, including corporations, intergovernmental organisations and NGOs; *Key Issues and Legal Frameworks* - brings fresh perspectives of the common general issues of international environmental law, such as biological diversity and marine environmental law; *Regional Environmental Law* - explores the specific regimes developed to address regional environmental issues, considering the evolution, prospects and relationship of regional law and mechanisms to IEL; *Cross-Cutting Issues* - considers the engagement of international environmental law with other key fields and legal regimes, including international trade, human rights and armed conflict;

*Contemporary and Future Challenges* - analyses pressing current and emerging issues in the field including environmental refugees and climate change, REDD and deforestation, and 'treaty congestion' in IEL. This up-to-date and authoritative book makes it an essential reference work for students, scholars and practitioners working in the field.

Financial accounting theory has numerous practical applications and policy implications, for instance, international accounting standard setters are increasingly relying on theoretical accounting concepts in the creation of new standards; and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices. The global financial crisis has also led to a new found appreciation of the social, economic and political importance of accounting concepts generally and corporate financial reporting in particular. For instance, the fundamentals of capital market theory (i.e. market efficiency) and measurement theory (i.e. fair value) have received widespread public and regulatory attention. This comprehensive, authoritative volume provides a prestige reference work which offers students, academics, regulators and practitioners a valuable resource containing the current scholarship and practice in the established field of financial accounting theory.

*The Leading Edge of Early Childhood Education* aims to support the effort to simultaneously scale up and improve the quality of early childhood education by bringing together relevant insights from emerging research to provide guidance for this critical, fledgling field. It reflects

the growing recognition that early childhood experiences have a powerful effect on children's later academic achievement and long-term life outcomes. Editors Nonie K. Lesaux and Stephanie M. Jones bring together an impressive array of scholarly contributors. Topics include:

- creating learning environments that support children's cognitive and emotional development;
- identifying and addressing early risk factors;
- using data to guide educators' practice; and
- capitalizing on the use of technology.

Recent years have seen a surge of local, state, and national initiatives aimed at expanding and improving early childhood initiatives, particularly regarding access to preK programs. The *Leading Edge of Early Childhood Education* promises to be a valuable resource for those charged with enacting the next level of work in this critical area.

Linking Science to Policy for a New Generation Palgrave Macmillan

Driven by the increasing importance of discussions around 'impact' and its meaning and implications for history, *The Impact of History?* brings together established and new voices to raise relevant questions, issues and controversies for debate. The chapters are articulated around the themes of public history, the politics of history, the role of history in the shaping of learning and the situation of history in the changing world of education. While this subject is driven differently by the research bodies and councils of different countries, similar debates about the value and place of the academy in society are taking place in the UK, the USA and Europe as well as in other parts of the world. Chapters cover diverse areas of history from this perspective including: public history national histories new technologies and the natural sciences campaigning histories the impact agenda. This collection is a political and intellectual intervention at a time when scholars and readers of history are being asked to explain why history matters and it seeks to intervene in the debates on 'impact', on education and on the role of the past in the shaping of our future. Bringing together leading authors from a wide range of fields, *The Impact of History?* is an accessible and engaging yet polemical and thought-provoking overview of the role of history in contemporary society.

Literature Education in the Asia-Pacific Nomos Verlag

This volume explores China's cultural heritage ideology and policies from three interrelated perspectives: the State and World Heritage tourism; cultural heritage tourism at undesignated sites, and the cultural politics of museums and collections. Something of a cultural heritage designation craze is happening in China. This is new within even the last five to ten years. Officials at many levels

now see heritage preservation as a means for commoditizing their regions. They are devoting new resources and attention to national and international heritage designations. Thus, addressing cultural heritage politics in a nation dedicated to designation is an important project, particularly in the context of a rapidly growing economy. This volume is also important because it addresses a very wide range of cultural heritage, providing an excellent sample of case studies: historic vernacular urban environments, ethnic tourism, scenic tourism, pilgrimage as tourism, tourism and economic development, museums, border heritage, underwater remains, and the actual governance and management of the sites. This volume is an outstanding introduction to cultural heritage issues in China while contributing to Chinese studies for those with greater knowledge of the area.

The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times.
