The Old Grey Whistle Test Quiz

Book Learning Matters

American schools are often the victims of numbers games because its education is in the hands of politicians, the populace, and pundits. How Americans view numbers, science, and research profoundly impacts the ability of politicians to manipulate our schools from pre-K through graduate education. Even in classrooms, teachers are routinely implementing flawed assessment strategies based on misguided assumptions about numbers and commonly held statistical truths. American educators need to step out from under the restrictive mandates of politicians and their growing mania for measuring students - they need to leave the numbers games behind and take control of their profession. Nowadays, critical care medicine is no
longer for experts only, but it is a field in
which researchers and clinicians, nurses

interdisciplinary way, each offering their
own skills. The volume is divided in six
sections, devoted to critical care key
issues, to lung diseases, to trauma, to acid-

ACoRN: Acute Care of At-Risk
Newborns Simon and Schuster

The Acute Care of at-Risk
Newborns (ACoRN) program trains
health care providers to stabilize
that most challenging and enigmatic
of medical patients: the unwell
newborn. Early assessment,
intervention, and management of at-
risk or unstable infants can be
critical for their survival and long-
term health. Clinical care standards
and educational programs to
address these requirements are
needed. The ACoRN program

provides a unique, prioritized, and
systematic approach to newborn
stabilization for health care
professionals (HCPs) with any
degree of experience. ACoRN-
trained providers learn to gather
information, prioritize, intervene
appropriately, and deliver high
quality care to at-risk and unwell
newborns in any setting. Because
research and practice have
advanced dramatically in recent
years, the need for a new ACoRN
text, the program's centrepiece,
became essential: hence the
development of this new edition,
which reflects current guidelines
and evidence-based best
practices. ACoRN teaches the
concepts and skills required to
stabilize unwell newborns through
system-based algorithms
('Sequences'), each with its own
chapter:- Respiratory- Neurology-
Surgical Conditions- Cardiovascular-
Fluid and Glucose- Jaundice-
Thermoregulation- Infection
The ACoRN mnemonic defines
stabilization steps and chapter
structure: Alerting Signs, Core
Steps, Organization of Care,
Response, Next Steps, and Specific
Diagnosis and Management. Each
chapter includes educational
objectives, key concepts, learning
points, and at least one case
scenario with questions and answers
to reinforce content and
learnings. This book is written for
any health professional who may be
required to participate in the
stabilization of sick or preterm

babies within their scope of practice. The Canadian Paediatric Society (CPS) has worked to improve the health of children and youth since 1922. Backed by the expertise of more than 3,000 paediatricians, the CPS makes sure that parents and professionals have the best possible information about child and youth health and well-being. The CPS is also involved in advocacy, research and education for health care providers.
