National Safety Council programs and products are designed to benefit all types of learning styles by combining lectures, video presentations, group discussions, and hands-on training.

*Primary Science for the National Standards Curriculum* Springer Science & Business Media  
Foreign Humanitarian Assistance, Joint Publication 3-29, 14 May 2019 This publication provides fundamental principles and guidance to plan, execute, and assess foreign humanitarian assistance operations. This publication has been prepared under the direction of the Chairman of the Joint Chiefs of Staff (CJCS). It sets forth joint doctrine to govern the activities and performance of the Armed Forces of the United States in joint operations, and it provides considerations for military interaction with governmental and nongovernmental agencies, multinational forces, and other interorganizational partners. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document,

---

no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain.

We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Practical Aviation and Aerospace Law  
McGraw-Hill

Issued in earlier editions under the title Practical aviation law.

Fundamentals of Industrial Hygiene Skyhorse Publishing, Inc.

This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed

investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

The Book of R Cengage Learning  
Cancer can be beaten with natural medicine, and this insider's guide will show you how. Dr Lam is a western-trained medical doctor whose clinical practice in natural medicine has helped many overcome and prevent cancer. In this easy to read book, you will learn first hand the science, the research, and specific protocols on how you can start using natural medicine today together with or in place of conventional medicine to beat cancer. Whether your cancer is active or in remission, this is a must read if you want to win the battle against cancer.  
NSC Emergency Medical Response [With DVD and Pocket Guide] John Wiley & Sons  
One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise – and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with

---

Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.

*Beating Cancer with Natural Medicine*

National Geographic Kids

This manual is developed for use within advanced first aid, CPR, and AED training courses offered through the Emergency Care & Safety Institute. Based on the 2010 International Consensus Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC), *Advanced First Aid, CPR, and AED, Sixth Edition* is ideal for use within college-level courses designed to certify individuals in first aid, CPR, and AED. More than a stand-alone text, this student manual is the center of an integrated teaching and learning system that offers many resources to better support instructors and prepare

students. This manual includes: Coverage of the 2010 CPR and ECC Guidelines: Clear, concise direction on how to perform CPR and use an AED during an emergency. Current information on injuries and illnesses: Core information for first aiders presented in a clear and straightforward format. Skill Drills: Offer step-by-step explanations and visual summaries of important skills. Emergency Care Wrap-Up Tables: Provide a concise summary of what signs first aiders should look for and what treatment steps they should take. About the Emergency Care & Safety Institute The Emergency Care & Safety Institute (ECSI) is an internationally renowned organization that provides training and certifications that meet job-related requirements as defined by regulatory authorities such as OSHA, The Joint Commission, and state offices of EMS, Education, Transportation, and Health. ECSI's courses are delivered throughout a range of industries and markets worldwide, including colleges and universities, business and industry, government, public safety agencies, hospitals, private training companies, and secondary school systems. ECSI offers world-class training solutions in the areas of: Advanced Cardiac Life Support Automated External Defibrillation Babysitter Safety Bloodborne and Airborne Pathogens CPR (Layperson and Health Care levels) Driver Safety Emergency Medical Responder (formerly known as First Responder) First Aid (Standard, Advanced, Pediatric, Wilderness, and other levels) Oxygen Administration

Introduction to Sports Medicine and Athletic Training (Book Only) McGraw-Hill Education New edition of a standard reference revised every four to six years since 1946 (the previous edition was 1997). Intended for both novices and seasoned safety professionals, as well as managers, educators, and professionals in the fields of risk management, loss control, human resources, and engineering, who must formulate safety program goals and objectives. After introductory material, coverage is in sections on loss control information and analysis;

### Standard First Aid, Cpr, and Aed Guide

National Safety Council

Developed by a team of dedicated educators from Jamaica, to meet the specific needs of the integrated Jamaican curriculum. - Challenge children to think about the concepts they have learned with problem-solving opportunities. - Help pupils actively explore mathematics through practical, hands-on activities. - Encourage children to make links and connections between maths and the real world with points for discussion. - Develop reading, writing, speaking and listening skills through specially developed activities, assessment pages and teacher support with colourful work books for Grades 1-3 and Pupil Books for Grades 4-6. Bloodborne and Airborne Pathogens First Aid Quick Guide Standard First Aid, Cpr, and Aed Guide NSC Advanced First Aid, CPR & AED Database System Concepts by Silberschatz, Korth and Sudarshan is now in its 6th edition and is one of the cornerstone texts of database education. It presents the fundamental concepts of database management in an intuitive manner geared toward allowing students to begin working with databases as quickly as possible. The text is designed for a first course in databases at the junior/senior undergraduate level or the first year graduate level. It also contains additional material that can be used as supplements or as introductory material for an advanced course. Because the authors present concepts as intuitive descriptions, a familiarity with basic data structures, computer organization, and a high-level programming language are the only prerequisites. Important theoretical results are covered, but formal proofs are omitted. In place of proofs, figures and examples are used to suggest why a result is true.

Advanced First Aid, CPR, and AED Boy Scouts of Amer

Basic Algebra and Advanced Algebra systematically develop concepts and tools in algebra that are vital

to every mathematician, whether pure or applied, aspiring or established. Together, the two books give the reader a global view of algebra and its role in mathematics as a whole. The presentation includes blocks of problems that introduce additional topics and applications to science and engineering to guide further study. Many examples and hundreds of problems are included, along with a separate 90-page section giving hints or complete solutions for most of the problems.

First Aid, CPR & AED Workbook F A Davis Company

This new edition focuses on preparing your students to assume the role as a significant member of the health-care team and manager of care, and is designed to help your students transition to professional nursing practice.
