Under Constantine's successors the legions were reduced in size and increasingly sidelined in favour of new units of elite auxilia, but between AD 284 and 337 the legions reigned supreme. The legionaries defeated all-comers and spearheaded a stunning Roman revival that humbled the Persian Empire and reduced the

mighty Goths and Sarmatians to the status of vassals. This title details the equipment, background, training and combat experience of the men from all parts of the empire who made up the backbone of Rome's legions in this pivotal period. *How Anyone, Anywhere Can Make A Difference* Springer Science & Business Media This major revision to United States Army publication, Army Regulation AR 600-20 Army Command Policy July 2020, prescribes the policies and responsibilities of command, which include the Army Ready and Resilient Campaign Plan, military discipline and conduct, the Army Military Equal Opportunity (MEO) Program, the Army

In the drive to achieve universal primary education as one of the Millennium Development Goals, there is an increasing recognition of the urgency of focusing on teacher education to both meet the demand for more than one million qualified teachers required to achieve this goal within sub-Saharan Africa, as well as to combat the sometimes poor quality educational experience reported in the school. Currently, approximately only one third of teachers are qualified to teach. This dearth in qualified teachers also means that secondary and tertiary education need to be improved upon to provide an educated cohort of graduates. This in turn will ensure that the quality of teacher trained and retained within the profession is of a sufficiently high standard to ensure sustainable progress. This volume focuses on the various aspects of teacher education which need to be

addressed in order for the wider Millennium Goals to be achieved, but more importantly, so that each African child living within sub-Saharan Africa will have the right to a quality education: ensuring they too experience their right and entitlement as children to reach their full potential - often taken for granted in Western countries - giving African children the necessary tools to build a better future for themselves. Of particular interest to the education researcher and policy maker, this volume's contributors look at the various issues and challenges around the teacher profession, particularly in relation to resources and practices within sub-Saharan Africa. The contributors examine the issue of building research capacity for educational research within teacher education Colleges and explore the concept of education for sustainable development with the view to improving the development of quality teacher education within the global South. In this volume, research reports are presented highlighting the various challenges within the structure and provision of teacher education within certain national contexts,

including assessment and curricula issues, which need to be addressed. This volume goes from the global to the local and examines teacher educator teaching, learning and reflective practice issues within different contexts, as well as exploring alternative pre-service experiences for western teachers who wish to work within the sub-Saharan context as well as some teacher educator exchange programmes between the South and North. Case countries explored include Lesotho, South Africa, Mozambique, Uganda, Kenya, Tanzania and Madagascar, to mention but a few. Of particular value to the education researcher and policy maker, this book provides a timely resource focusing on an area of neglect, highlighting the central role of the teacher and teacher education towards sustainable development within the sub-Saharan African context.

Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their classmates.
