Migration is the most volatile sociopolitical issue of our time, as the current escalation of discourse and action in the United States and Europe concerning walls, border security, refugee camps, and deportations indicates. The essays by the international and interdisciplinary group of scholars assembled in this volume offer critical filters suggesting that this escalation and its historical precedents do not preclude redemptive counterstrategies. Encoded in narratives of

affiliation and escape, these counterstrategies are variously launched as literary, cinematic, and civic interventions in past and present constructions of diasporic, migratory, or exilic identities. The essays trace these narratives through the figure of the "exile" as it moves across times, borders, and genres, transmogrifying into the fugitive, the escapee, the refugee, the nomad, the Other. Arguing that narratives and figures of migration to and in Europe and the Americas share tropes that link migration to kinship, community, refuge, and hegemony, the volume identifies a transhistorical, transcultural, and transnational common ground for experiences of mediated diaspora, migration, and exile at a time when public discourse and policy-making emphasize borders, divisions, and violent confrontations.

In *Elusive Equality*, Jeffrey L. Littlejohn and Charles H. Ford place Norfolk, Virginia, at the center of the South's school desegregation debates, tracing the crucial role that Norfolk's African Americans played in efforts to equalize and integrate the city's schools. The authors relate how local activists participated in the historic teacher-pay-parity cases of the 1930s and 1940s, how they fought against the school closures and "Massive Resistance" of the 1950s, and how they challenged continuing patterns of discrimination by insisting on crosstown busing in the 1970s and 1980s. Despite the advances made by local activists, however, Littlejohn and Ford argue that the vaunted "urban advantage" supposedly now enjoyed by Norfolk's public schools is not easy to reconcile with the city's continuing gaps and disparities in relation to race and class. In analyzing the history of struggles over school integration in Norfolk, the authors scrutinize the stories told by participants, including premature declarations of victory that laud particular achievements while ignoring the larger context in which they take place. Their research confirms that Norfolk was a harbinger of national trends in educational policy and civil rights. Drawing on recently released archival materials, oral interviews,

and the rich newspaper coverage in the Journal and Guide, Virginian-Pilot, and Ledger-Dispatch, Littlejohn and Ford present a comprehensive, multidimensional, and unsentimental analysis of the century-long effort to gain educational equality. A historical study with contemporary implications, their book offers a balanced view based on a thorough, sober look at where Norfolk's school district has been and where it is going.

A state-of-the-art, one-stop resource, Public Administration in South Asia: India, Bangladesh, and Pakistan examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.
