For over a decade, from 1976 to 1986, Neville Wran led the most successful Labor Government in New South Wales history.Now, for the first time, key ministers, advisers, public servants, party and union officials, and Wran himself, provide a critical retrospective on the era and its legacy today.It was an era of unrivalled electoral success - four electoral victories were won, including two 'Wranslides' in 1978 and 1981. Wran was a hugely popular leader who galvanised Labor supporters around the nation, and provided the model for modern Labor leadership and government.It was also an era of sound economic management and moderate progressive reform which transformed New South Wales in ways taken for granted today.Significant policy achievements, and some mistakes, are noted in health, education, transport, conservation, consumer affairs, Aboriginal affairs, the status and rights of women, industrial relations, anti-discrimination and equal opportunity law reform, the arts and heritage protection, the public service, and electoral and institutional reform.The contributions cover key policy areas, politics and elections. The candid views of the main players are balanced with those of academics, journalists and commentators. New interviews, original research and fresh analysis combine to provide a unique perspective on The Wran Era.The Wran Era in the Paper..."The Balmain boy who became a Labor Party hero: Neville Wran dead at 87", The Australian April 21, 2014 Read full article...

Curriculum design options cover a continuum from regional and school-based programs to national and international frameworks. How does policy speak to practice? What have teacher-researchers discovered through in-classroom studies? Where do you begin to describe or measure 'effective' language education curriculum design? The Routledge Handbook of Language Education Curriculum Design presents a comprehensive collection of essays on these issues by 31 established practitioners and new researchers. Informed by experienced scholarship and fresh studies, this handbook shares international perspectives on language education from policy and curriculum to teacher training and future directions. The handbook addresses language education curriculum design across five sections: Language curriculum design: perspectives, policies and practices Designs across the curriculum Curriculum designs in language education Curriculum resources, evaluation and assessment Teacher education, research and future projects With contributions from Australia, Brazil, Indonesia, Switzerland, Timor-Leste and more, the handbook represents the breadth of research into and the global implications for sound language education curriculum design. It considers equally the needs of students and policy makers from urban metropolises and remote communities. It is designed to reinvigorate discussions about education policy, curriculum management and the role of teacher-researchers.

Major changes in the emphases of education programs in Australian schools have occurred since 1986. The states and territories collaborated to define the general content for a national curriculum in eight 'key learning areas'. At the same time, they developed a common framework for describing what students have learned in relation to that curriculum. This report presents a comprehensive picture of the key people, decisions, events, problems and successes as the states and territories embarked on making the new 'outcomes- based' approach a reality for teachers and students. The book contains: a detailed chapter from each state and territory education system; results from a 1996 national survey of principals and teachers; commentary and insights collected from teachers during school visits; and, evidence and examples of 'best practice' implementation strategies.

*The Wran Era* Emerald City Books  
Focusing on Australia, Canada, and New Zealand, Religious Education and the Anglo-World examines the relationship between empire and religious education. Demonstrating close historical connections between case studies, the work calls for a transnational approach to the study of religious education.

In an age where the use of electronic media is expanding and the nature of traditional texts and text-based learning is changing, new literacies are becoming increasingly important in the school classroom. This volume examines how new literacies can be used in the English curriculum, and presents a series of research-based studies applied to every level of school-age education. The chapters examine: early literacy; picture books; the internet; secondary school English; and the problems of assessment in the new literacy age. This forward-thinking volume will be of interest to teachers and academics researching education, literacy, applied linguistics, and social semiotic theory.

Federation Press  
Includes various departmental reports and reports of commissions. Cf. Gregory. Serial publications of foreign governments, 1815-1931.  
*Australian Education Index*  
Updated and revised edition of a text on basic economics for Higher School Certificate Year 12 students, first published in 1990. Includes updated statistics and information about the dramatic changes in domestic and international economics which have occurred in recent years. Divided into five parts, focusing on income and expenditure analysis, macroeconomics and international, development and industry economics. Chapters contain revision and discussion questions and tables of key concepts. Includes a glossary of important terms and an index. The industry economics option was written by Peter Ireland, who, along with co-author Peta Batty, is a member of the NSW Catholic Schools Trial HSC Economics Examination Committee. Barry Collier is a former economics consultant and is currently a practising solicitor. A related workbook is also available.
