Retransmission Consent Negotiations (US Federal Communications Commission Regulation) (FCC) (2018 Edition) The Law Library presents the complete text of the Retransmission Consent Negotiations (US Federal Communications Commission Regulation) (FCC) (2018 Edition). Updated as of May 29, 2018 The Federal Communications Commission ("Commission") adopts a rule providing that it is a violation of the duty to negotiate retransmission consent in good faith for a television broadcast station that is ranked among the top four stations as measured by audience share to negotiate retransmission consent jointly with another such station, if the stations are not commonly owned and serve the same geographic market. The rule is intended to promote competition among Top Four broadcast stations for carriage of their signals by multichannel video programming distributors and facilitate the fair and effective completion of retransmission consent negotiations. This book contains: - The complete text of the Retransmission Consent Negotiations (US Federal Communications Commission Regulation) (FCC) (2018 Edition) - A table of contents with the page number of each section

This book explores how we can understand the place of music from a self psychological perspective, by investigating three journeys: the one we take when listening to music, the literal journey of the author from Nazi Germany to the United States, and the subjective round-trip between the past and the present. Drawing on the work of Heinz Kohut, the author examines how music can provide us with a way to reconnect with a sense of self, and how this can manifest in psychological and physical ways. There is particular reference to the work of Richard Wagner, Cole Porter, and Richard Strauss, and an examination of how their music enabled them, in times of stress and crisis, to restore and maintain a more positive sense of self. Finally, the book looks back at the author ’ s own experiences of music and the place of music in the Jewish world. With clinical excerpts, personal narrative, and sophisticated psychoanalytic insights, this book will appeal to all psychoanalysts wanting to understand the place of music in shaping the psyche, as well as music scholars wishing to gain a deeper appreciation of the psychology of music.

Information and communication technologies (ICTs) have been proven to promote economic growth, but do we know that ICTs reduce poverty? This book provides new empirical evidence on access to and use of ICTs and their effect on poor

households in four East African countries: Kenya, Rwanda, Tanzania and Uganda. It addresses the questions: Do women benefit economically from using ICTs? Are the livelihoods of rural users boosted? Which ICTs are being used by low-income entrepreneurs? ICT Pathways to Poverty Reduction presents a conceptual framework to analyze how the dynamics of poverty change over time and to shed light on whether ICT access benefits the poor as well as the not-so-poor. The chapters contain case studies on how various forms of ICTs affect different aspects of poverty based on research in East and Southern African countries at the household level or in small and medium enterprises. Six of the chapters in this book are based on data from the PICTURE Africa study between 2007 and 2010. Two additional chapters detail country-specific studies based on findings from other research projects. Overall, the study concluded that ICTs make a difference to the livelihoods of the poor and contribute to reducing both financial and non-financial dimensions of poverty. ICT Pathways to Poverty Reduction is essential reading for policymakers and researchers in international development, as well as staff of development agencies working on livelihoods for the poor.
