Prepare students for Pennsylvania's end-of-course assessment with Keystone Finish Line Literature. Lessons are aligned to the Keystone Exams: Literature Assessment Anchors and Eligible Content, and provide plenty of practice with the types and length of literature found on the test. The book is divided into two modules with a review at the end of each: Module 1 focuses on fiction, such as plays, poems, short stories, and classic literature; Module 2 covers nonfiction, such as functional, instructional, expository, and argumentative texts. Just like the Keystone, many practice questions feature authentic texts with items that address Depth of Knowledge (DOK) levels 2 and higher and students will answer multiple-choice and constructed-response questions. Each lesson is specific to a skill or content area, and includes an instructional review, guided practice, and independent work.

Give your students every chance for success with Keystone Finish Line Biology. This workbook reviews Pennsylvania's Assessment Anchors and Eligible Content of the Keystone Biology Exam, and familiarizes students with the format of tested question types. Practice questions range in difficulty, with many Depth of Knowledge (DOK) levels 2 and 3 items that call for higher-order reasoning. Supportive illustrations, graphs, and artwork build on concepts. Units include multiple-choice items and rigorous constructed-response problems that test multiple anchors. A review section at the end of each module can be used as a practice test. Practice questions are frequently posed in real-life contexts. Learning support includes reminders and examples for illustration. Students will also see guided examples with explanations that show how to find the answer in a logical way. A glossary of important terms is included.

"This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics" (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer

PPI FE Electrical and Computer Practice Problems – Comprehensive Practice for the FE Electrical and Computer Fundamentals of Engineering Exam Ingram

Meet Kevin Pugh, 12-year-old couch potato. Now meet Cromwell, his part beagle, part potato chip dog. Kevin's looking forward to spending his summer doing as little as possible. Unfortunately, Kevin's father, former Chicago Bears star player/super-sports fanatic, Howie Pugh, feels differently. So does Cromwell, who has suddenly and mysteriously developed a fascination with agility competitions: running up seesaws, leaping over hurdles, soaring through hoops (sometimes). If he has to do anything, Kevin would rather do something for newly obsessed Cromwell, but dog agility lessons do not constitute a sport in his father's mind, so football camp it is. Until some well-timed events collide, literally, and soon Kevin's found a way for he and Cromwell to take classes, and the upstart Team Cromwell is born. Andy Behrens has written a hilarious novel with a dry-as-dirt protagonist who's constantly tortured by the goings-on around him. It's also a charming story about a boy and his dog, as well as a meaningful and heartfelt look at a relationship between a boy and his father who don't always see eye-to-eye.

Linear Algebra Problem Book can be either the main course or the dessert for someone who needs linear algebra and today that means every user of mathematics. It can be used as the basis of either an official course or a program of private study. If used as a course, the book can stand by itself, or if so desired, it can be stirred in with a standard linear algebra course as the seasoning that provides the interest, the challenge, and the motivation that is needed by experienced scholars as much as by beginning students. The best way to learn is to do, and the purpose of this book is to get the reader to DO linear algebra. The approach is Socratic: first ask a question, then give a hint (if necessary), then, finally, for security and completeness, provide the detailed answer.
