This book seeks to fill a lacuna in studies of the Epistle to the Hebrews, namely,  
the writer's theology of the Mosaic Law, which is seen most clearly in the

doctrinal center of the book, 7:1-10:18. Joslin concludes that for the writer of Hebrews the work of Christ has transformed the Law, and that this transformation involves both its fulfillment and internalization in the New Covenant; the Law has forever been affected christologically. As such, there are continuous and discontinuous aspects of the Law that turn on the hinge of Christ, the writer's chief 'hermeneutical principle'.

The goal of this redaction-critical investigation is to determine what in Luke 22 is special to Luke, to assess its origin, and to uncover Luke's purpose in using this material. Unlike earlier studies, Soards concentrates on lines of thought that link the chapter with the Gospel as a whole. The author's conclusion is that though Luke did not use a single coherent source other than Mark for this chapter, his diverse material was chosen in order to advance Luke's distinctive interests in Christology, eschatology and ecclesiology. Christologically, Jesus is shown as in charge of the Passion events and as the realization of a divine plan; eschatologically, the Passion is portrayed as inaugurating the era of the Last Days; ecclesiologically, Jesus's attitude to his disciples functions as instruction for Luke's readers about their role in God's plan.

The book constitutes the refereed proceedings of the 4th International Conference on Distributed Computing in Sensor Systems, DCOSS 2008, held on Santorini Island, Greece, in June 2008. The 29 revised full papers and 12 revised short papers presented were carefully reviewed and selected from 116 submissions. The papers propose a multitude of novel algorithmic design and analysis techniques, systematic approaches and application development methodologies for distributed sensor networking. The papers cover aspects including energy management, communication, coverage and

tracking, time synchronization and scheduling, key establishment and authentication, compression, medium access control, code update, and mobility.

Publications of the National Electric Light Association.- YOUTH COMPETITION TIMES

Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of "Canon of Medicine" (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

In what is certain to be the key reference on iguanas for years to come, some of the world's leading experts offer a clear and accessible account of the latest research on the evolution, behavioral ecology, and conservation of these highly visible and increasingly endangered creatures, much loved by professional herpetologists and hobbyists alike. The book begins with an introduction by noted iguana biologist Dr. Gordon Burghardt that examines the state of iguana research—past, present, and future—with an emphasis on social behavior. Three major sections follow, each opening with a synthesis by the volume editors, who survey the current status and likely future direction of

---

investigations in the pertinent area. The first section focuses on different aspects of the taxonomic and morphological diversity of iguanas and includes a complete checklist of species. In the second section, contributors address the behavior and ecology of iguanas and provide compelling evidence that both may be far more complex than previously appreciated. The third and final section, highlighting the threats facing iguana populations today, describes the broad array of innovative conservation strategies that will be needed to help ensure their survival. Illustrated throughout with photographs, distribution maps, tables, and figures, this volume will be the definitive resource for anyone—professional or curious amateur—interested in iguanas.

... dedicated to the advancement and understanding of those principles and practices, military and political, which serve the vital security interests of the United States.

*Extra Globe*

This collection of chapters tracks and explains the impact of the nine core United Nations human rights treaties in 20 selected countries, four from each of the five UN regions. Researchers based in each of these countries were responsible for the chapters, in which they assess the influence of the treaties and treaty body recommendations on legislation, policies, court decisions and practices. By covering the 20 years between July 1999 and June 2019, this book updates a study done 20 years ago.
