To successfully complete the transition from being a final year pre-reg nursing student to becoming a qualified staff nurse, students need to understand and practise the responsibilities and roles of the registered nurse. Consequently, they need a textbook which goes further than simply outlining the theory of leadership and management and teamwork and gives more than just 'tips' for being in charge. Nursing: transition to professional practice has been developed as a one-stop-shop for the principles of professional practice and the skills of the qualified nurse. Taking a logical approach, the authors introduce the role of the qualified nurse before explaining what it means to be in charge, how to deliver good care, how to make legal and ethical decisions, and the best ways to work with and teach other staff. Theory is applied to clinical work so readers can easily see the rationale behind daily decisions. Useful for the entire final year, the content is mapped against the transitional module and extremely useful for final year placements as well as providing tips on getting a job and continuing professional development. Written in an easy to read, student friendly manner the authors have brought together trustworthy and reliable advice in a way that is easy to dip into any time you need it- from writing an assignment, devising a nursing plan, documenting your placement learning outcomes, or finding advice on job applications. This book has been truly designed to help student nurses become registered staff and to prepare for practice. Online material - Interactive cases on common scenarios and problems that the Newly Qualified Nurse needs to manage . - Job hunting section with practical exercises and sections on writing CV's, interview practice questions etc to print off.

Developing Nursing Practice with Children and Young People explores the context of children's nursing in light of recent policy changes, and looks at contemporary issues and emerging roles within the field. Divided into four parts, Part One focuses on the emergence of children's nursing in healthcare, detailing events and developments that have shaped the role of children's nurses. Part Two examines many aspects of practice for registered practitioners in nursing, ranging from acute care settings to children's nurses' developing roles in primary care, mental health and with children and young people with special health and social needs. Part Three then provides a detailed analysis of advanced practice in children's nursing. The advanced skills portfolio is presented in depth, augmented by exemplars of a number of advanced practice roles which have already been established. Finally, Part Four builds on the previous three parts by offering several case studies from practice - including accounts from children, young people and families, as well as assistant practitioners and student nurses. The text concludes by focusing on the longer term scope for children's nurses.

Financial and Business Management for the Doctor of Nursing Practice F.A. Davis

Competencies for Advanced Nursing Practice is the first and definitive book to deliver guidance for practitioners working to be recognized for their advanced nursing practice.

Written by experienced academics and advanced nurse practitioners from a variety of clinical backgrounds, this handbook will support nurses on their journey towards advanced nursing practice and provide detailed information on achieving the competencies within each of the seven domains outlined in the RCN and the NMC's proposed Standards of Proficiency for Advanced Nurse Practitioners: the nurse-patient relationship; respecting culture and diversity; management of patient health/illness status; the education function; professional role; managing and negotiating health care delivery systems; and monitoring and ensuring the quality of health care practice. The text concludes with a section on how practice can be recorded and used in the portfolioing and accreditation process, how to collect and record evidence and how nurses can be supported and facilitated through this process. Aimed at the professional nurse working towards an advanced level of practice, the nurse already practising at this level and seeking accreditation and also the student and newly qualified nurse giving early consideration to their future career, this book offers clear and user-friendly guidance for anybody wishing to undertake this standard of nursing practice.
