'The perfect text for any health care professional who wishes to gain a sound understanding of research...This text succeeds where others fail in terms of the thoroughness of the research process and the accessible style in which the material is presented. In an age when nursing and health care research is going from strength to strength this book offers those in the world of academia and practice an excellent and essential 'bible' that is a must on any bookshelf' Dr Aisha Holloway, Lecturer Adult Health, Division of Nursing, The University of Nottingham 'a book that helps you each step of the way. A very understandable and enjoyable publication' Accident and Emergency Nursing Journal 'key reference resource that students of research can use at various levels of study. It is comprehensive, user friendly and very easy to read and make sense of' Gillian E Lang, Amazon reviewer The sixth edition of this book reflects significant developments in nursing research in recent years, ensuring the reader is provided with the very latest information on research processes and methods. It continues to explore how to undertake research as well as evaluating and using research findings in clinical practice, in a way that is suitable for both novice researchers and those with more experience. Divided into six sections, the chapters are ordered in a logical fashion that also allows the reader to dip in and out. The first two sections of the book provide a comprehensive background to research in nursing. The third section presents a variety of qualitative and quantitative approaches, both new and well-established. The final three sections then look at collecting and making sense of the resulting data and putting the research findings into clinical practice. Summarises key points at the start of each

Now in its sixth edition, this highly popular text covers the range of ethical issues affecting nurses and other healthcare professionals. Authors Simon Robinson and Owen Doody take a holistic and practical approach, focused in the dialogue of ethical decision making and how this connects professional, leadership and governance ethics in the modern healthcare environment. This focuses on the responsibility of professionals and leaders, and the importance of shared responsibility in the practice of healthcare. With a foreword by the eminent medical ethicist Alastair Campbell, the revised edition includes contemporary topics, such as the duty of candour, recent cases, such as the Mid Staffs scandal, and ethical perspectives on vulnerable groups, such as; persons with intellectual/learning disability, dementia and those with an enduring mental illness. It builds on professional identity and personal development as part of ongoing learning, individual and organizational, and provides interactive ways that helps the reader to develop reflective ethical practice. This text aims to enable ethical engagement with the ever changing healthcare environment, and is a must-have for anyone serious about ethics in healthcare. Holistic and practice relevant approach New perspectives on vulnerable groups, such as persons with intellectual/learning disability, dementia and those with an enduring mental illness Descriptive (including moral psychology) as well as normative ethical theory Promoting dialogue and engagement with practice, practitioners, patients and families Development of professional ethical skills Connecting professional ethics to leadership, governance and social ethics Highly accessible format Case studies/Scenarios presented within chapters and pause for thought exercises to promote dialogue and engagement Suitable for pre/post registration nurses, students, health care professionals

Measurement in Nursing and Health Research Lippincott Williams & Wilkins

This title is directed primarily towards health care professionals outside of the United States. It is a well-known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings. The development of competence in these practices is one of the most important aspects of pre-registration programmes, and this is one of the few UK-based texts that takes an educational approach to these practices as opposed to a purely procedure-driven approach. As in previous editions, the emphasis is on a holistic approach with the recognition that each patient is a unique individual. Each procedure contains rationale and information for patient education in addition to step by step guidance. Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers confidence when they begin clinical work Relevance to hospital and community settings makes it applicable to a wide audience The rationale sections link to the evidence-base thereby ensuring best practice

Munro's Statistical Methods for Health Care Research Lippincott Williams & Wilkins

Winner of the 1st-place American Journal of Nursing Book of the Year award in nursing research/evidence-based practice for 2021! Burns & Grove's *The Practice of Nursing Research: Appraisal, Synthesis, and Generation of Evidence*, 9th Edition is the trusted resource for those wanting to master the research methods that are foundational to evidence-based practice. This highly respected textbook covers how to appraise and apply existing research evidence, as well as how to participate in research and quality improvement projects. This new 9th edition has been extensively updated to reflect today's focus on online research in the digital era and includes clear, step-by-step guidelines for all major quantitative and qualitative research approaches — including supporting examples from the latest high-quality literature. There's also new content on translational research, coverage of the most current research tools and techniques, and an increased use of illustrations, tables, and other visuals to help engage visually oriented readers of all levels. Coverage of quantitative, qualitative, and other research methodologies provides a solid foundation to conduct,

appraise, and apply research evidence to the realities of today's clinical practice. Balanced coverage of qualitative and quantitative methods addresses the qualitative research methodologies that are often the starting point of research projects, particularly in magnet hospitals and DNP programs. Clear, comprehensive coverage is organized into five units that include: an introduction to nursing research; coverage of the research process; application for evidence-based health care; how to analyze data, determine outcomes, and disseminate research; and how to propose and seek funding for research. Strong emphasis on evidence-based practice addresses this key graduate-level QSEN competency and reinforces how to generate research evidence and appraise and synthesize existing research for application to clinical practice. Rich examples from nursing literature bring research principles to life. Emphasis on the most currently used research methodologies focuses on the methods used in both quantitative research and qualitative research, as well as outcomes research and mixed-methods research. Coverage of digital data collection examines the use of online research tools. Quick-reference summaries include a table of research methods inside the front cover and a list of types of research syntheses (with definitions) inside the back cover. Helpful user resources are included with each new text purchase on the companion Evolve website and feature 400 interactive review questions along with a library of 10 full-text research articles.

Principles, Process and Issues Elsevier Health Sciences

"This textbook explicitly links understanding of nursing research with evidence-based practice, and focuses on how to read, critique, and utilize research reports. Organized around questions students have when reading reports--how the conclusions were reached, what types of patients the conclusions apply to, how the study was done, and why it was done that way--the text explains the steps of the research process to answer these questions"--Résumé de l'éditeur.
