Effectiveness. Efficiency. Excellence. These words and concepts permeate current literature, courses, and discussions. They are defined in nearly as many different ways as the number of people who write and talk about them. For practical purposes, the definitions seem to boil down to these: - Effectiveness - doing the right things. - Efficiency - doing things right. - Excellence - efficiently meeting effective goals, both short term and long range. We believe that this book can help you improve the effectiveness, efficiency and excellence of your system for managing loss control ... and for quality, production and cost control. In essence, it can help improve your management system. Improved quality, production and cost control go hand-in-hand with improved loss control, and they all depend on how the system is managed. The idea that excellence in safety and production go hand in hand is not new. As early as 1928 the American Engineering Council, based on an engineering and statistical study, demonstrated that an organization with decreasing injury rates is eleven times more likely to show increased production than an "unsafe" one. We believe that the book's concepts, practices, techniques and tools reflect what leading organizations around the free world have done, and are doing, to get their results. Spanning more than three decades, we have had the good fortune to work with tens of thousands of leaders in hundreds of organizations to distill the contents of this book. The ideas and applications are tried, tested, and proven. Put them to work and they will work for you.

Studies in the Language of Geoffrey Chaucer Apress

First published in 1935, "Sex & Temperament" is a fascinating and brilliant anthropological study of the intimate lives of three New Guinea tribes from infancy to adulthood. Focusing on the gentle, mountain-dwelling Arapesh, the fierce, cannibalistic Mundugumor, and the graceful headhunters of Tchambuli -- Mead advances the theory that many so-called masculine and feminine characteristics are not based on fundamental sex differences but reflect the cultural conditioning of different societies. This edition, prepared for the centennial of Mead's birth, features introductions by Helen Fisher and Mead's daughter, Mary Catherine Bateson. A precursor to Mead's illuminating "Male & Female, Sex & Temperament" lays the groundwork for her lifelong study of gender differences.

The loss of speech in adulthood due to acquired disabilities causes an enormous life change for the person it happens to -- and everyone close to them. With this important book, you'll explore the challenges these individuals face during the transition from speaking to using augmentative and alternative communications (AAC). You'll learn new ways to design individualized AAC systems that will help rebuild their communicative confidence and encourage acceptance of their

new lives -- and for some, even before speech is lost. Practical, and accessible, this research-based resource addresses recent social, medical, and technical changes and how they affect adults with communication disorders. Part 1 discusses the everyday transition issues they struggle with -- such as establishing new communication roles and integrating their natural speech with AAC -- while Part 2 covers the six leading neurological disorders in adults: amyotrophic lateral sclerosis, Huntington and Parkinson's diseases, traumatic brain injury, aphasia, and dementia. "Absolutely splendid . . . essential for understanding why there is so much bad thinking in political life right now." —David Brooks, New York Times How to Think is a contrarian treatise on why we're not as good at thinking as we assume—but how recovering this lost art can rescue our inner lives from the chaos of modern life. As a celebrated cultural critic and a writer for national publications like The Atlantic and Harper's, Alan Jacobs has spent his adult life belonging to communities that often clash in America's culture wars. And in his years of confronting the big issues that divide us—political, social, religious—Jacobs has learned that many of our fiercest disputes occur not because we're doomed to be divided, but because the people involved simply aren't thinking. Most of us don't want to think. Thinking is trouble. Thinking can force us out of familiar, comforting habits, and it can complicate our relationships with like-minded friends. Finally, thinking is slow, and that's a problem when our habits of consuming information (mostly online) leave us lost in the spin cycle of social media, partisan bickering, and confirmation bias. In this smart, endlessly entertaining book, Jacobs diagnoses the many forces that act on us to prevent thinking—forces that have only worsened in the age of Twitter, "alternative facts," and information overload—and he also dispels the many myths we hold about what it means to think well. (For example: It's impossible to "think for yourself.") Drawing on sources as far-flung as novelist Marilynne Robinson, basketball legend Wilt

Chamberlain, British philosopher John Stuart Mill, and Christian theologian C.S. Lewis, Jacobs digs into the nuts and bolts of the cognitive process, offering hope that each of us can reclaim our mental lives from the impediments that plague us all. Because if we can learn to think together, maybe we can learn to live together, too.
