New York City's municipal water supply system provides about 1 billion gallons of drinking water a day to over 8.5 million people in New York City and about 1 million people living in nearby Westchester, Putnam, Ulster, and Orange counties. The combined water supply system includes 19 reservoirs and three controlled lakes with a total storage capacity of approximately 580 billion gallons. The city's Watershed Protection Program is intended to maintain and enhance the high quality of these surface water sources. Review of the New York City Watershed Protection Program assesses the efficacy and future of New York City's watershed management activities. The report identifies program areas that may require future change or action, including continued efforts to address turbidity and responding to changes in reservoir water quality as a result of climate change.

Videodiscs in Healthcare: A Guide to the Industry Routledge
This book constitutes a major new resource for professionals working with hard core smokers and their families. It is designed as a practical, clinically useful and up-to-date guide for all those in a position to intervene: mental health professionals, physicians, dentists, nurses, pharmacists and other health care professionals, clergy, human resource and employee assistance program corporate staff, and teachers and guidance counselors. New research suggests that difficult-to-treat smokers often have emotional problems adjusting to stopping smoking. Some also have psychiatric diagnoses or abuse other substances. These are factors which interfere with their efforts to quit. Because these difficulties have been poorly understood, hard-core smokers have not been provided with adequate resources and skills to overcome their addiction. These smokers are in need of increasingly comprehensive assessment and treatment. Despite massive public health education about the dangers of cigarette smoking, rates of smoking among the population are no longer declining in the United States and the success rates of clinical programs for smokers remain low. Helping the Hard-Core Smoker seeks to explain why current approaches are often inadequate and how best to help today's highly nicotine-dependent smokers who are struggling with their addiction quit.

Compilations of research on teacher preparation often include no more than a cursory mention of the specific roles and needs of special education teachers. Although the work that special education teachers perform does indeed differ from the work of classroom teachers, teacher preparation in the two fields has much in common. The purpose of this seven-part handbook is to expand our knowledge of teacher education broadly by providing an in-depth look at the most up-to-date research on special education teacher preparation. Opening chapters ground the collection in political and economic context, while subsequent sections delve deeply into issues related to the current state of our special education workforce and offer insights into how to best prepare and sustain that workforce. Ultimately, by illuminating the particularities of special education teacher preparation, this landmark handbook addresses the state of current research in the field and sets an agenda for future scholarship.
