Jude is twenty-one when she flies in a private plane to Sark, a tiny carless Channel Island and the last place in Europe to abolish feudalism. She's been hired for the summer to tutor a rich local boy named Pip. But when Jude arrives, the family is unsettling. Pip is awkward, overly literal, and adamant he doesn't need a tutor, and upstairs, his enigmatic mother Esm é casts a shadow over the house. Enter Sofi: the family's holiday cook, a magnetic, mercurial Polish girl with appalling kitchen hygiene, who sings to herself and sleeps naked. When the father of the family goes away on business, Pip's science lessons are replaced by midday ros é and scallop-smuggling, and summer begins. Soon something powerful starts to touch the three together. But those strange, golden weeks on Sark can't last forever. Later, in Paris, Normandy and London, they find themselves looking for the moment that changed everything. Compelling,

sensual, and lyrical, *The Last Kings of Sark* by Rosa Rankin-Gee is a tale of complicated love, only children and missed opportunities, from an extraordinary new writer.

I Need You More Than I Love You and I Love You to Bits ABRAMS
Julia Blackburn has always collected things that hold stories about the past, especially the very distant past: mammoth bones, little shells that happen to be two million years old, a flint shaped as a weapon long ago. Shortly after her husband ’ s

death, Blackburn became fascinated with Doggerland, the stretch of land that once connected Great Britain to Continental Europe but is now subsumed by the North Sea. She was driven to explore the lives of the people who lived there—studying its fossil record, as well as human artifacts that have been unearthed near the area. In *Time Song*, Blackburn brings us along on her journey to discover what Doggerland left behind, introducing us to the paleontologists, archaeologists, fishermen and fellow Doggerland enthusiasts she meets along the way. She sees the footprints of early humans fossilized in the soft mud of an estuary alongside the scattered pockmarks made by rain falling eight thousand years ago. She visits a cave where the remnants of a Neanderthal meal have turned to stone. In Denmark she sits beside Tollund Man, who seems to be about to wake from a dream, even though he had lain in a peat bog since the start of the Iron Age. As Doggerland begins to come into focus, what emerges is a profound meditation on time, a sense of infinity as going backward and an intimation of the immensity of everything that has already passed through its time on earth and disappeared.

I Miss You, I Miss You! Prometheus Books

This book is an outgrowth of lectures given on several occasions at Chalmers University of Technology and Goteborg University during the last ten years. As opposed to most introductory books on complex analysis, this one assumes that the reader has previous knowledge of basic real analysis. This makes it possible to follow a rather quick route through

the most fundamental material on the subject in order to move ahead to reach some classical highlights (such as Fatou theorems and some Nevanlinna theory), as well as some more recent topics (for example, the corona theorem and the H^1 -BMO duality) within the time frame of a one-semester course. Sections 3 and 4 in Chapter 2, Sections 5 and 6 in Chapter 3, Section 3 in Chapter 5, and Section 4 in Chapter 7 were not contained in my original lecture notes and therefore might be considered special topics. In addition, they are completely independent and can be omitted with no loss of continuity. The order of

the topics in the exposition coincides high school. The whole summer to a large degree with historical developments. The first five chapters essentially deal with theory developed in the nineteenth century, whereas the remaining chapters contain material from the early twentieth century up to the 1980s. Choosing methods of presentation and proofs is a delicate task. My aim has been to point out connections with real analysis and harmonic analysis, while at the same time treating classical complex function theory.
