Atoms and Ashes: A Global History of Nuclear Disasters Emerald Group Publishing

The Prospect of Global History takes a new approach to the study of global history, seeking to apply it, rather than advocate it. The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones, and insists on depth in historical analysis. The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history. Chapters range from historical sociology to economic history, from medieval to modern times, from European expansion to constitutional history, and from the United States across South Asia to China.

A magisterial history of the centuries-long conflict between "progress" and "tradition" in the world's largest international institution. The story of Roman Catholicism has never followed a singular path. In no time period has this been more true than over the last two centuries. Beginning with the French Revolution, extending to the Second Vatican Council in the 1960s, and concluding with present-day crises, John T. McGreevy chronicles the dramatic upheavals and internal divisions shaping the most multicultural, multilingual, and global institution in the

world. Through powerful individual stories and sweeping birds-eye views, Catholicism provides a mesmerizing assessment of the Church's complex role in modern history: both shaper and follower of the politics of nation states, both conservator of hierarchies and evangelizer of egalitarianism. McGreevy documents the hopes and ambitions of European missionaries building churches and schools in all corners of the world, African Catholics fighting for political (and religious) independence, Latin American Catholics attracted to a theology of liberation, and Polish and South Korean Catholics demanding democratic governments. He includes a vast cast of riveting characters, known and unknown, including the Mexican revolutionary Fr. Servando Teresa de Mier; Daniel O'Connell, hero of Irish emancipation; Sr. Josephine Bakhita, a formerly enslaved Sudanese nun; Chinese statesman Ma Xiaobang; French philosopher and reformer Jacques Maritain; German Jewish philosopher and convert, Edith Stein; John Paul II, Polish pope and opponent of communism; Gustavo Gutiérrez, Peruvian founder of liberation theology; and French American patron of modern art, Dominique de Menil. Throughout this essential volume, McGreevy details currents of reform within the Church as well as

movements protective of traditional customs and beliefs. Conflicts with political leaders and a devotional revival in the nineteenth century, the experiences of decolonization after World War II and the Second Vatican Council in the twentieth century, and the trauma of clerical sexual abuse in the twenty-first all demonstrate how religion shapes our modern world. Finally, McGreevy addresses the challenges faced by Pope Francis as he struggles to unite the over one billion members of the world's largest religious community. A CHOICE Outstanding Academic Title 2014! 2014 winner of the American Association for the History of Nursing's Mary M. Roberts Award for Exemplary Historical Research and Writing!
The Routledge Handbook on the Global History of Nursing brings together leading scholars and scholarship to capture the state of the art and science of nursing history, as a generation of researchers turn to the history of nursing with new paradigms and methodological tools. Inviting readers to consider new understandings of the historical work and worth of nursing in a larger global context, this groundbreaking volume illuminates how research into the history of nursing moves us away from a reductionist focus on diseases and treatments and towards more inclusive ideas about the experiences of illnesses on individuals, families, communities, voluntary organizations, and states at the bedside and across the globe. An extended introduction by the editors provides an overview and analyzes the key themes involved in the transmission of ideas about the care of the sick. Organized into four parts, and addressing nursing around the globe, it covers: New directions in the history of nursing; New methodological approaches; The politics of nursing knowledge; Nursing and its relationship to social practice. Exploring themes of people, practice, politics and places, this cutting edge volume brings together the best of nursing history scholarship, and is a vital reference for all researchers in the field, and is also relevant to those studying on nursing history and health policy courses.

Gardner's Art through the Ages: A Concise Global History Cambridge University Press

When the colonies that became the USA were still dominions of the British Empire they began to imagine their sporting pastimes as

finer recreations than even those enjoyed in the motherland. From the war of independence and the creation of the republic to the twenty-first century, sporting pastimes have served as essential ingredients in forging nationhood in American history. This collection gathers the work of an all-star team of historians of American sport in order to explore the origins and meanings of the idea of national pastimes—of a nation symbolized by its sports. These wide-ranging essays analyze the claims of particular sports to national pastime status, from horse racing, hunting, and prize fighting in early American history to baseball, basketball, and football more than two centuries later. These essays also investigate the legal, political, economic, and culture patterns and the gender, ethnic, racial, and class dynamics of national pastimes, connecting sport to broader historical themes.

American National Pastimes chronicles how and why the USA has used sport to define and debate the contours of nation. This book was published as a special issue of the *International Journal of the History of Sport*.

A chilling account of more than half a century of nuclear catastrophes, by the author of the “definitive” (*Economist*) Cold War history, *Nuclear Folly*. Almost 145,000 Americans fled their homes in and around Harrisburg, Pennsylvania, in late March 1979, hoping to save themselves from an invisible enemy: radiation. The reactor at the nearby Three Mile Island nuclear power plant had gone into partial meltdown, and scientists feared an explosion that could spread radiation throughout the eastern United States. Thankfully, the explosion never took place—but the accident left deep scars in the American psyche, all but ending the nation's love affair with nuclear power. In *Atoms and Ashes*, Serhii Plokhy recounts the dramatic history of Three Mile Island and five more accidents that have dogged the nuclear industry in its military and civil incarnations: the disastrous fallout caused by the

testing of the hydrogen bomb in the Bikini Atoll in 1954; the Kyshtym nuclear disaster in the USSR, which polluted a good part of the Urals; the Windscale fire, the worst nuclear accident in the UK's history; back to the USSR with Chernobyl, the result of a flawed reactor design leading to the exodus of 350,000 people; and, most recently, Fukushima in Japan, triggered by an earthquake and a tsunami, a disaster on a par with Chernobyl and whose clean-up will not take place in our lifetime.

Through the stories of these six terrifying incidents, Plokhy explores the risks of nuclear power, both for military and peaceful purposes, while offering a vivid account of how individuals and governments make decisions under extraordinary circumstances.

Today, there are 440 nuclear reactors operating throughout the world, with nuclear power providing 10 percent of global electricity. Yet as the world seeks to reduce carbon emissions to combat climate change, the question arises: Just how safe is nuclear energy?

From turn-of-the-century horseracing to the monolithic anti-doping attitudes now supported by sporting organizations, the development of anti-doping ideology has spread throughout modern sport. Yet heretofore few historians have explored the many ways that international sport has responded to doping. This book seeks to fill that gap by examining different aspects of sport's global efforts to respond to athletes doping. By incorporating cultural, political, and feminist histories that examine international responses to doping, this special issue aims to better articulate the narrative of doping. The work starts with the first mention of doping in any sport. It examines not only the first efforts to ban doping but also the athletes who sought performance enhancers. Focusing on specific framing events, authors in this

issue examine how history of doping and how it has indelibly marked the sporting landscape. The result is a work with both breadth and focus. From stories of Japanese swimmers to Italian runners to American jockeys, the work spans the range of doping history. At the same time, the authors remain focused around one single issue: the history of doping in sport. This book was published as a special issue of the International Journal of the History of Sport.

A microhistory of eighteenth-century systemic change that places ordinary French lives alongside global advances Provincializing Global History explores the subtle transformation of the coastal province of the Languedoc in the eighteenth century. Mining a wealth of archival sources, James Livesey unveils how provincial elites and peasant households unwittingly created new practices. Managing local political institutions, establishing new credit systems, building networks of natural historians, and introducing new plants and farm machinery to the region opened up the inhabitants of the province to new norms and standards. The practices were gradually embedded in daily life and allowed the province to negotiate the new worlds of industrial society and capitalism. Teaching Recent Global History explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order

to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: • An overarching narrative that helps readers address historical arguments; • Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them; • Lesson plans suitable for both middle and secondary level classrooms; • Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

Noted jazz scholar, biographer, and critic Stuart Nicholson has written an entertaining and enlightening consideration of the music's global past, present, and future. Jazz's emergence on the world scene coincided with America's rise as a major global power. The uniqueness of jazz's origins--America's singularly original gift of art to the world, developed by African Americans--adds a level of complexity to any appreciation of jazz's global presence. In this volume, Nicholson covers such diverse and controversial topics as jazz in the iPod musical economy, issues of globalization and authenticity, jazz and American

exceptionalism, jazz as colonial tip of the sword, global interpretation, and the limits of jazz as a genre. Nicholson caps the volume with fascinating and anecdote-rich discussions of jazz as a form of "modernism" in the twentieth century, the history of jazz fads (such as the cakewalk) that elicited very different reactions among American and European audiences, and a hearty defense of Paul Whiteman and his efforts to legitimize jazz as art. Stuart Nicholson has written a thought-provoking and opinionated work that should equally engage and enrage all manner of jazz lovers, scholars, and aficionados.

This book explores the global history of anti-apartheid and international solidarity with southern African freedom struggles from the 1960s. It examines the institutions, campaigns and ideological frameworks that defined the globalization of anti-apartheid, the ways in which the concept of solidarity was mediated by individuals, organizations and states, and considers the multiplicity of actors and interactions involved in generating and sustaining anti-apartheid around the world. It includes detailed accounts of key case studies from Europe, Asia, and Latin America, which illustrate the complex relationships between local and global agendas, as well as the diverse political cultures embodied in anti-apartheid. Taken together, these examples reveal the tensions and synergies, transnational webs and local contingencies that helped to create the sense of 'being global' that united worldwide anti-apartheid campaigns.

This thoughtful examination of a century of travel writing about the American West overturns a variety of popular and academic stereotypes. Looking at both European and American travelers' accounts of the West, from de Tocqueville's *Democracy in America* to William Least Heat-Moon's *Blue Highways*, David Wrobel offers a counter narrative to the nation's romantic entanglement with its western past and suggests the importance of some long-overlooked authors, lively and perceptive witnesses to our history who deserve new attention. Prior to the professionalization of academic disciplines, the reading public gained much of its knowledge about the world from travel writing. Travel writers found a wide and respectful audience for their reports on history, geography, and the natural world, in addition to reporting on aboriginal cultures before the advent of anthropology as a discipline. Although in recent decades western historians have paid little attention to travel writing, Wrobel demonstrates that this genre in fact offers an important and rich understanding of the American West—one that extends and

complicates a simple reading of the West that promotes the notions of Manifest Destiny or American exceptionalism. Wrobel finds counterpoints to the mythic West of the nineteenth century in such varied accounts as George Catlin's *Adventures of the Ojibbeway and Ioway Indians in England, France, and Belgium* (1852), Richard Francis Burton's *The City of the Saints* (1861), and Mark Twain's *Following the Equator* (1897), reminders of the messy and contradictory world that people navigated in the past much as they do in the present. His book is a testament to the instructive ways in which the best travel writers have represented the West.

The *Global News Challenge* tackles one of the timeliest topics in mass communication today—the challenges facing international broadcasters with universal branding strategies in developing countries. In these heavily government-controlled media environments with a scarcity of reliable information, international news providers traditionally had an influential position. With the ongoing media liberalization, however, commercial domestic providers have gained in strength to become strong competitors. Additionally, in a number of countries, pan-Arab broadcasting enterprises have widened their reach, contributing to the growing competition for traditional international providers such as the BBC or France 24. This book employs a global perspective to explore the subject across the whole population and different media platforms in select developing markets of Africa and South Asia. It is unique in providing a theoretical framework by which to analyze demand and usage of and trust in news from international broadcasters across the whole population, not just opinion leaders. It outlines the strategic options for international broadcasters in these evolving market contexts.

The Emotions of Internationalism BRILL
Challenging the assumption that the capitalist transformation includes a radical break with the past, this edited volume traces how historically older forms of social inequality are transformed but persist in the present to shape the social structure of contemporary societies in the global South. Each social collective comprises an interpretation of itself – including the meaning of life, the concept of a human person, and the notion of a collective. This volume studies the interpretation that various social collectives have of themselves. This interpretation is referred to as social ontology. All chapters of the edited volume focus on the relation between social ontology and structures of inequality. They argue that each society comprises several historical layers of social ontology that correspond to layers of inequality, which are referred to as sociocultures. Thereby, the volume explains why and how structures of inequality differ between contemporary collectives in the global South, even though all of them seem to have similar structures, institutions, and economies. The volume is aimed at academics, students and the interested public looking for a novel theorization of social inequality pertaining to social collectives in the global South.
