Version CreateSpace Updated and supplemented with recent New York State Regents Exams in Spanish, this book covers fundamentals of Spanish grammar, usage, oral proficiency, and listening comprehension as prescribed by the New York State Board of Regents, and includes the changes to the exam for 2002 as established by the

Board. The accompanying compact disc contains listening comprehension exercises, as well as the listening comprehension sections of exams presented in the book. Students will find answer keys for all questions. French CLEP Test Study Guide CreateSpace This study explores the word identification processes used by adult bilingual Spanish/English readers of varying proficiencies in both L1 and L2, and how these relate to reading comprehension levels in L1 and L2. It has been proposed in word reading research that lexical processing (accessing the word directly from the lexicon) is more efficient than sublexical processing (assembling the phonology of a word letter by letter). This investigation is

concerned with the type of bilingual processing used by readers of varying ability. Three groups of Spanish/English bilingual readers, who differed across both L1 and L2 in their reading comprehension levels, performed a reading and listening task in both Spanish (Experiment 1) and English (Experiment 2). A third monolingual control group performed the task in their L1, English (Experiment 3). The on-line procedure involved presenting words visually and aurally, for participants to make a yes/no choice as to whether the words match. This bimodal task, not previously used in second language research, presented equal difficulty for readers of all proficiency types. The written words appeared in either uniform (lower) case or alternating (aLtErNaTiNg) case, to test reliance on lexical processing during word identification. Overall, L1 Spanish readers of all proficiency levels used similar strategies for L1 word identification, but the less proficient readers showed this effect when orthographic form was disrupted, i.e., when the stimuli were presented in alternating case. In L2, the less proficient readers tended to rely more on a sublexical strategy, while the high proficiency group used a lexical strategy.

Crosslinguistic correlations indicated that readers who showed more disruption (as evidenced by higher reaction times) to alternating case stimuli in L1 Spanish had lower proficiency levels in English, indicating that L1 reading skill influences L2 reading proficiency. These findings combined support dual route models of reading, and have important implications for educational decisions: both sublexical and lexical skills are emergent in L1 and L2, and should be focused on in instructional settings.

Self-Study and Diversity II is a book about the self-study of teacher education practices in a diverse world. In this volume, the authors examine the preparation of teachers through a shared orientation to diversity grounded in a commitment to addressing issues of identity, equity, diversity, social justice, inclusion, and access in their professional practice. The first chapters are autobiographical studies in which teacher educators reflect on how their personal identities as minorities within a historically oppressive culture inform their professional practice. These powerful narratives are followed by accounts of teacher educators addressing diversity issues in the United Arab Emirates, India, South Africa, and Thailand. The closing chapters attend to the challenges of preparing teacher candidates to become inclusive educators in a diverse world. Even though each chapter focusses on a particular dimension of equity and social justice or dilemma of practice, the insights in these self-studies are relevant to all teacher educators interested in improving teacher education by respecting diversity and becoming more inclusive. Particular strengths are the

diversity of authors and international scope of the book.

****Testimonial**** I just wanted to drop you guys a line and tell you that I passed my final CLEP exam last Monday which gives me all of the credits I need to graduate. I have taken 30 credits worth of CLEP exams and I've passed them all by using your study

guides. I actually purchased one of your study guides and failed my first test. I didn't fail because of your guide though, I failed because I didn't manage my time effectively and I ran short. I looked at your study guide after failing though, and a lot of the information on your study guide was very relevant to what was on the test. So, I tried again with a different test and a different study guide of yours. I passed. This pattern continues for 30 credits. I graduate on June 9th thanks to you guys, so I wanted to say thank you. The guides were worth every penny. Thanks, -John S.**** I would like to thank you for your study guides. I will be graduating in December with two bachelor degrees and CLEP helped me get there quickly. I gained 36 credits through CLEP and your study guides helped me through almost all of them. I can honestly say that I would not have passed many of the tests without your guides. Great products. Thanks!! -Erin W.****

This book addresses the need for tests that can diagnose the strengths and weaknesses in learners' developing foreign language proficiency. It presents the rationale for, and research surrounding, the development of DIALANG, a suite of internet-delivered diagnostic foreign language tests funded by the European Commission. The word 'diagnosis' is common in discussions in language education and applied linguistics, but very few truly diagnostic tests exist. However, the diagnosis of foreign language proficiency is central to helping learners make progress. This volume explores the nature of diagnostic testing, emphasizing the need for a better understanding of the nature of appropriate diagnosis. The book starts with a debate about how diagnostic testing might most appropriately be developed. Charles Alderson argues that the field has neglected to construct diagnostic tests, partly because other forms of testing have dominated the field. Alderson examines how proficiency has been diagnosed in the key areas of language: reading, listening, writing, grammar and vocabulary. The value of self-assessment is discussed and exemplified as a key component in developing learners', and teachers', awareness of the complexity of language learning. The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency. Motor Vehicle Representative McGraw Hill Professional

DoD Training The New Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Fundaci3n Telef3nica Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and

complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those

responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

This quantitative study investigates the relationship between Hispanic high school English language learners ' English language proficiency and mathematical resilience using a Pearson ' s r and Spearman ' s r correlation tests. The sample population consists of 9th-12th grade students enrolled in a large public high school in the northeast whose native language is Spanish. English proficiency is measured using the New York State English as a Second Language Achievement Test. Mathematic resilience is measured using the Mathematical Resilience Scale. The results of this study establish a positive relationship between Hispanic high school students ' level of English

language proficiency and mathematical resilience, particularly amongst males. These results can help to inform educators of how to best support the needs of a diverse population of students. The results may also influence curriculum changes in mathematics courses to include explicit instruction in the growth of mathematical resilience.
