### Cambridge IGCSE & O Level Biology: Exam Success Hodder Education

The Cambridge IGCSE® & O Level Biology Exam Success Guide fully supports the latest Cambridge IGCSE (0610) & O Level (5090) syllabuses and is suitable for use alongside our Complete and Essential IGCSE Biology series. The Guide helps students cope with the increased rigour of linear IGCSEs by bringing clarity and focus to exam preparation and by providing explicit exam guidance. Learners can recap content through easy-to-digest chunks, apply this via targeted revision activities, review and reflect on their work, and use exam practice and worked examples to achieve best results. The Biology Exam Success Guide is written by Ron Pickering, teacher trainer for Cambridge and author of the Complete Biology Student Book. Students can benefit from his expertise and excellent understanding of what support they need in order to reach their full potential. Other resources are also available: a Practical Workbook, Student Books and Workbooks. The Practical Workbook helps students to achieve practical exam success. The Complete or Essential Student Book is at the heart of delivering the course and is available in print, online or in a great-value print and online pack. The Workbook is for independent practice and strengthens exam potential inside and outside the classroom.

### Cambridge International AS and A Level Biology Revision Guide Oxford University Press - Children

This volume is a tutorial for the study of dynamical systems on networks. It discusses both methodology and models, including spreading models for social and biological contagions. The authors focus especially on "simple" situations that are analytically tractable, because they are insightful and provide useful springboards for the study of more complicated scenarios. This tutorial, which

also includes key pointers to the literature, should be helpful for junior and senior undergraduate students, graduate students, and researchers from mathematics, physics, and engineering who seek to study dynamical systems on networks but who may not have prior experience with graph theory or networks. Mason A. Porter is Professor of Nonlinear and Complex Systems at the Oxford Centre for Industrial and Applied Mathematics, Mathematical Institute, University of Oxford, UK. He is also a member of the CABDyN Complexity Centre and a Tutorial Fellow of Somerville College. James P. Gleeson is Professor of Industrial and Applied Mathematics, and co-Director of MACSI, at the University of Limerick, Ireland.
