Teaching and
Learning Foreign
Languages provides
a comprehensive
history of language
teaching and
learning in the UK
from its earliest
beginnings to the
year 2000.
McLelland offers
the first history
of the social
context of foreign
language education
in Britain, as well
as an overview of
changing
approaches, methods
and techniques in
language teaching
and learning. The
important impact of
classroom-external
factors on
developments in

language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that

language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching

and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.
