Caribbean youths often struggle. This work analyzes the nature of educational pedagogy in the contemporary capitalist world-system under American hegemony. Mocombe and Tomlin interpret the role of education as an institutional or ideological apparatus for capitalist domination, and examine the sociolinguistic means or pedagogies by which global and local social actors are educated within the capitalist world-system to serve the needs of capital; i.e., capital accumulation. Two specific case studies, one in the United States and one in the United Kingdom, are utilized to demonstrate how contemporary educational emphasis on language and literacy parallels the organization of work and contributes to the debate on academic underachievement of black students vis-a-vis their white and Asian counterparts. easyuni Sdn Bhd First Published in 2002. Modes and categories inherited from the past no longer seem to fit the reality experienced by a new generation.

‘ New Accents ’ is intended as a positive response to the initiative offered by such a situation. Each volume in the series will seek to encourage rather than resist the process of change, to stretch rather than reinforce the boundaries that currently define literature and its academic study. This selection of essays is an attempt to open up some of the as yet unsurveyed

territory of English Studies and to introduce a new, more positive tone and greater range of voices to discussions of the future of the subject.

2017. MATSDA is an international materials development association founded in 1993 which serves to bring together researchers, teachers, materials developers and publishers in an effort to improve the effectiveness of language learning materials. The 2017 conference centred on issues related to the development of meaning-

focused materials for language learning, and attracted presenters from twenty-five countries stretching from Greenland to Brazil. These issues are reflected in the chapters in this volume, with each one focusing on a different aspect of meaning-focused materials and many of them introducing the reader to previously unexplored facets of the theory of meani

ng-focused instruction and its application to materials development. The contributions here are of essential value to post-graduate students, to teachers, to materials developers and to researchers. They are written to be academically rigorous, but at the same time accessible to newcomers to the field and to experienced experts alike. Language, Literacy, and
