authentication models, approaches to layout and navigation, how to integrate Ajax, how to deal with localization issues like time zones and translations, how to customize the look and feel of an APEX web site, and more. The authors are well-qualified to write on APEX. John Scott is a hard-core APEX developer and his coauthor, Scott Spendolini, is one of the original creators of APEX. Social Science Research McGraw Hill Professional Oracle's E-Business Suite Human Capital Management enables organizations to architect a global foundation

for HR data and improved business processes. The book starts by introducing Oracle Application E-Business Suite, its architecture, and how to set up the preliminary components such as roles, groups, and profile options. As you progress through the chapters, you'll learn to define common data from an enterprise perspective, such as the unique structures for jobs, positions, job groups, and other business entities. As we move from learning the core HR structures, you'll learn to implement people management concepts such as maintaining personal information, identifying assignments, managing assignments of personnel, changing assignments, and terminating an assignment or employee. By the end of this book, you will have a thorough knowledge of implementing a fully functional HR system based on strategic business needs, along with a detailed

understanding of the key functions and benefits of Oracle HCM.

Pro Oracle Application Express 4 is your key to mastering one of the most innovative products to come out of Oracle in years. Application Express, termed "APEX" for short, is fast becoming one of the easiest and most

widely-used of tools for creating enterprise-level applications that run against an Oracle database. APEX is easy enough for power users to create ad-hoc applications atop something more reliable than a spreadsheet. Yet APEX is powerful and extensible enough to enable fully-scalable, enterprise-level applications that are accessed by thousands of users. Authors Tim Fox, John Scott, and Scott Spendolini take you to the professional level in developing for Application Express. They show how to handle user authentication in enterprise environments and how to extend APEX by writing components based upon Oracle's new plug-in architecture. You'll learn to deal with localization issues such as time zones and translations, and to customize the look and feel of an APEX website to blend in with your

corporate branding strategy. The authors also cover web service development, performance and scalability, and the production issues that you encounter in enterprise-level deployments. Many years of experience in solving the “hard problems” are coalesced in this book to help you, the reader, take advantage of all that APEX has to offer. Focuses on high-end, enterprise-level development Covers new features such as plug-ins and Websheets Introduces the new interface released with APEX 4.0

Health communication is

key to promoting good population and individual health outcomes. As the field has developed, there is a growing need for a critical appraisal of the ideologies and theories underpinning health communication in order to ensure effective practice. This book clearly situates health communication within its social context. It provides a critical overview of three key disciplinary areas – education, psychology and communication. Drawing on international examples throughout, the book challenges the underlying assumptions that drive the design and delivery of health promotion interventions. The authors argue that health communication is inherently political and pay close attention to

issues of power, ethics and inequality throughout the text. This book will be valuable for those students at all levels who require a critical perspective, as well as practitioners in health communication and health promotion. With reference to detailed examples and annotated suggestions for further reading, the book is an accessible resource for analysing contemporary health communication.
