This textbook guides massage therapists through each step of delivering a spa treatment—from consideration of the indications and contraindications to scope of practice issues, supplies, room set-up, specific procedure steps, and ideas for integrating massage techniques, spa products, and enhancing accents. While wet-room treatments are discussed, the focus is on dry-room treatments, which can be delivered in a wider variety of settings. More than 250 full-color photographs illustrate each technique and treatment. Treatment Snapshot boxes provide a quick overview of the treatment before the detailed step-by-step procedures section. Sanitation Boxes offer clean-up and sanitation tips. Sample Treatments include promotional descriptions, product recommendations, and recipes for creating inviting smell-scapes.

ECEG2012-Proceedings of the 12th European Conference on e-Government Cambridge University Press

This study involved an exploration of the impact of organizational capital investment on employee innovation in the manufacturing industry. The overarching question was: Does organizational capital investment impact employee innovation in the manufacturing industry? Organizations tend to place much emphasis on how skill drives innovation, but not on how capital investment impact employee innovation. The research was guided using a qualitative phenomenological case study design to probe the impact of capital investment on employee innovation. Participants were selected through a convenience and purposive sampling method using the researchers personal professional network as well as the snowball method to seek participants from individuals referrals. Data collection involved personal interviews, audio recording, and note taking. The assumption was that employee innovation is not an option but a necessity, because organizations compete on global fronts for resources and market share. Consequently, capital investment in machinery and employee innovation becomes symbiotic in nature, not mutually exclusive. Results showed employee innovation can be impacted and enhanced

through the acquisition and application of appropriate technological capital investment. The researcher recommends further research to ascertain whether the amount of organizational capital investment is proportional to the development of employee innovativeness.
