George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell’s Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the ‘four great motives for writing’ – ‘sheer egoism’, ‘aesthetic

enthusiasm’, ‘historical impulse’ and ‘political purpose’ – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell’s mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer’s oeuvre. ‘A writer who can – and must – be rediscovered with every age.’ — Irish Times

The book has well turned out to be a boon for researchers from academia as well as industry. The book seemly meets the requirement and encounters the dilemma of a ‘first time researcher’ in many ways. The basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by Prestige Institute of Management and research, Gwalior. The

---

previous editions focused on steps to carry out review of literature, setting objectives, developing hypothesis, selecting appropriate methods as per objectives, drawing inferences followed by referencing styles. The book not only provides insights to a first time researcher but also introduces them with the latest tools. Part one of the book presents introduction to E views as Chapter 1. The chapter deals with step wise procedure to work with E views elaborately. E-Views is widely used numerous econometric analyses along with statistical analysis. E views provided analysis like cross-section, time series estimates and forecasts, as well as does panel data analysis simultaneously. Chapter 2 is modestly written to introduce ‘ Mendeley ’ to the researcher. ‘ Mendeley is expedient for copious objectives like conducting systematic literature review, research gap identification, setting objectives thereafter, and more over provides a most vital efficacy to manage research papers in a stress-free manner. ‘ Mendeley ’ is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds. Thus taking research on next level. Part two of the book contains twelve research papers covering diverse domains like finance, marketing, HR and, IT. The research papers are the sample papers exhibiting the concepts of writing a well-structured paper and elaborating the procedures to be followed while writing a research paper. The research papers included in the book are developed during the ‘ Five

Day National Research Methodology Workshop', organized by Prestige Institute of Management and research, Gwalior. The paper writing work was divided into 'before', 'during' and 'after' phases. Topic finalization, measure development, review of literature and data collection was done before the initiation of workshop among the teams of registered participants. The entire methodology, application of data analysis tools and discussion was done during the workshop. Post workshop i.e. the after phase was exclusively dedicated for strengthening the review of literature, discussion of results and, referencing followed by improvement in the overall structure and language of the research paper. In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts,

Telling people about research is just as important as doing it. But many competent researchers are wary of scientific writing, despite its importance for sharpening scientific thinking, advancing their career, obtaining funding for their work and growing the prestige of their institution. This second edition of David Lindsay 's popular book *Scientific Writing = Thinking in Words* presents a way of thinking about writing that builds on the way good scientists think about research. The simple principles in

this book will help you to clarify the objectives of your work and present your results with impact. Fully updated throughout, with practical examples of good and bad writing, an expanded chapter on writing for non-scientists and a new chapter on writing grant applications, this book makes communicating research easier and encourages researchers to write confidently. It is an ideal reference for researchers preparing journal articles, posters, conference presentations, reviews and popular articles; for students preparing theses; and for researchers whose first language is not English.

This revised and retitled edition of Searching Writing includes two additional I-Search papers, one by a teacher, and a new chapter entitled "The Larger Context," which shows how the I Search concept can work throughout the

whole curriculum in school and college. As with the first edition, The I-Search Paper is more than just a textbook; it's a new form of instructional help -- a context book -- that shows students what authority is in matters of learning and invites them to join the author and teacher in the educational movement called "Writing to Learn." To put this book in the hands of all the students in the course is not only to help them carry out an I-Search but to introduce them in a delightful way to the resources and tools of intellectual inquiry -- but one that never forgets the emotional or physical side of human activity. This is a rare textbook that treats students as partners in learning. It shows what it is to

take charge of one's own learning and suggests that this move is one that productive people keep making throughout their lives.

This book documents the results of a multi-year project that

investigated the goals for writing improvement among 45 students and their instructors in intensive courses of English as a Second Language (ESL) then, a year later, in academic programs at two Canadian universities. The researchers present a detailed framework to describe these goals from the perspectives of the students as well as their instructors. The goals are analyzed for groups of students from particular backgrounds internationally, for changes over time, and in relation to the ESL and academic courses. The authors use activity theory, goal theory,

---

various sociolinguistic concepts, and multiple data sources (interviews, observations, stimulated recalls, questionnaires, and text analyses) to provide a contextually-grounded perspective on learning, teaching, writing, second-language development, and curriculum policy. The book will interest researchers, educators, and administrators of ESL, university, college, and literacy programs around the world.
