The Population Situation Analysis (PSA) provides the basis for an integrated appraisal of the population and reproductive health dynamics and their impacts on poverty, inequality and development. By integrating a micro and macro analytical approach, the population situation analysis clarifies the interactions between individual behaviour and demographic dynamics. The Population Situation Analysis (PSA) responds to demand by countries that international cooperation should promote national capacity-building and recognize national ownership and leadership as prerequisites for development, in accordance with the principles agreed at the International Conference on Population and Development (ICPD) and the Millennium Declaration. This manual contributes to more efficient evidence-based programming, which relies on increased capacity for data generation, new databases, the consolidation of available evidence and the promotion of the use of hard data. The classic guide to teaching children at home for a new generation of homeschooling parents In 2019, there were more than two million children being homeschooled. That number doubled during the pandemic and is now likely to continue increasing as more parents worry that school might not be the best place for their children to learn and grow. Teach Your Own helped launch the homeschooling movement; now, its timeless and revolutionary message of recognizing the ways children come to understand the world has been updated for today's environment. Parents and caregivers will discover how to navigate: Learning in a classroom versus learning in the world The difference between a learning difficulty (which we all experience every time we try to learn anything) and a learning disability. Schedules that achieve the homeschooling-work-life balance that you want as a family The relationship between learning and play Homeschooling and technology And much more. John Holt's warm understanding of children and his passionate belief in every child's ability to learn have made this book an essential resource for over forty years to homeschooling families.

The Distributional Impact of Taxes and Transfers Taylor Trade Publications

The World Bank has partnered with the Commitment to Equity Institute at Tulane University to implement their diagnostic tool—the Commitment to Equity (CEQ) Assessment—designed to assess how taxation and public expenditures affect income inequality, poverty, and different economic groups. The approach relies on comprehensive fiscal incidence analysis, which measures the contribution of each individual intervention to poverty and inequality reduction as well as the combined impact of taxes and social spending. The CEQ Assessment provide an evidence base upon which alternative reform options can be analyzed. The use of a common methodology makes the results comparable across countries. This volume presents eight country studies that examine the distributional effects of individual programs and policy measures—and the net effect of each country's mix of policies and programs. These case studies were produced in the context of Bank policy dialogue and have since been used to propose alternative reform options.

Price Setting and Price Regulation in Health Care World Bank Publications

The objectives of this study are to describe experiences in price

setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).
