actual exam. First paper is Pure Mathematics & the second paper is Statistics & Mechanics.

The Essentials of GCSE OCR
Science for Specification A.
Psychology Press

I've written this book to help all those students taking this module to feel confident with the very basics. Fully understanding these points can gain you some precious marks in the exam which could potentially be the difference to a grade. The topics in FP3 aren't any more abstract than FP2 in fact I personally find the topics in FP3 easier to grasp, although harder to fully master. There is another book written

before this one which follows the same format covering the FP2 syllabus. So if you find this helpful you might want to check it out. How to use the book is completely up to you; you may use the book in line with a more in depth textbook using it to clarify any obscure points, you may choose to use the book for revision or even as a quick reference for when you get stuck on a practice paper. The book does not contain any specific exercises for you to practice as these can easily be found in other books or in past papers. Instead it shows you a clear and concise method to solve the example questions.
Statistics 1 for OCR Heinemann
Exam Board: OCR Level: Free

Standing Mathematics

Qualification Subject: Additional Mathematics First Teaching: September 2018 First Exam: Summer 2019 Enhance the skills learnt at GCSE and build the confidence to tackle higher-level Mathematics using this comprehensive textbook, tailored to the new OCR Additional Mathematics specification (2018).

- Consolidate GCSE Maths skills and prepare for A-level using hundreds of questions designed to bridge the gap between Key Stages 4 and 5.
- Expand on GCSE knowledge and confidently tackle new concepts with clear introductions to every topic and plenty of worked examples throughout.
- Boost performance

in Additional Maths and A-level Maths with expert guidance from subject specialists with extensive examining experience.

- Save time planning lessons using our free schemes of work that link to the relevant Integral resources.
- Approach your final assessment with confidence, by completing two full practice papers at the end of the book.

A Level Mathematics for OCR A Student Book 1 (AS/Year 1) Gcse Mathematics Ocr Linear Exam Board: OCR Level: AS/A-level Subject: Economics First Teaching: September 2015 First Exam:

Summer 2016 Ensure your students get to grips with the core practicals and develop the skills needed to succeed with an in-depth assessment-driven approach that builds and reinforces understanding; clear summaries of practical work with sample questions and answers help to improve exam technique in order to achieve higher grades. Written by experienced teacher Martin Rowland, this Student Guide for practical Biology: - Help students easily identify what they need

to know with a concise summary of required practical work examined in the A-level specifications. - Consolidate understanding of practical work, methodology, mathematical and other skills out of the laboratory with exam tips and knowledge check questions, with answers in the back of the book. - Provide plenty of opportunities for students to improve exam technique with sample answers, examiners tips and exam-style questions. - Offer support beyond the Student

books with coverage of methodologies and generic practical skills not focused on in the textbooks.
