GCSE Mathematics for OCR Foundation Student Book Cambridge University Press

Written by experienced examiners, OCR GCSE Mathematics A Higher Revision Guide will help you prepare for your exams, ensuring you have every chance for success.

Decision 2 for OCR James Currey Publishers  
I've written this book to help all those students taking this module to feel confident with the very basics. Fully understanding these points can gain you some precious marks in the exam which could potentially be the difference to a grade. The topics

in FP3 aren't any more abstract than FP2 in fact I personally find the topics in FP3 easier to grasp, although harder to fully master. There is another book written before this one which follows the same format covering the FP2 syllabus. So if you find this helpful you might want to check it out. How to use the book is completely up to you; you may use the book in line with a more in depth textbook using it to clarify any obscure points, you may choose to use the book for revision or even as a quick reference for when you get stuck on a practice paper. The book does not contain any specific exercises for you to practice as these can easily be found in other books or in past papers. Instead it shows you a clear and concise method to solve the example questions.

AS Level Mathematics June 2019 Potential Papers  
Coordination Group Publication

This book supports students preparing for the OCR GCSE exam. The practice papers in the book are carefully modelled after past papers and specifications of exam board to ensure that the papers as a whole provide a rich and varied practice to meet all requirements of GCSE mathematics with an appropriate difficulty. Papers are designed to teach students the most easily applicable, reusable and fastest solutions to typical problems, and utilise problems which target areas of maths which students typically forget under the pressure of an exam. Solutions provided have been reviewed by many students to ensure that they are easily understandable while being the fastest and most re-applicable.

The Essentials of GCSE OCR Science for Specification A. Nelson Thornes

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications.
